should we be doing or trying to do everything ourselves or might it be better to contract some tasks out to others could they do them better and cheaper than we can more and more state and local governments are asking these questions and while there are many answers on the federal level these answers often don t apply lower down the line nevertheless it is evident that contracting out is often the better strategy but how best to go about it what are the benefits and what are the hidden risks dr o looney s book provides precisely the guidance that state and local

managers need first how to decide to outsource a government service then step by step how to proceed based on extensive interviews and other research o looney takes managers through the intricacies of contract outsourcing and administration but in doing so he makes clear that he appreciates the importance of government his book is not an argument for privatization as so many other books are rather it is an affirmation of government and the benefits of its many services readers will find theory and advice on the services that are most suitable for contracting out a listing and review of the components of a high quality analysis including the analysis of often overlooked political organizational and functional aspects of government advice on how to go from deciding to outsource to actually designing implementing and monitoring a contract in situations that could prove hazardous to the livelihoods of government workers he also discusses the changes that need to be made in the organizational culture management and employee training as a result of the change to a contract based system of providing services the considerations in designing work specifications and other critical aspects of the government vendor relationship and how ideal contracting processes and ideal contracts can differ according to the nature of the service being contracted the result is a thorough and highly practical volume for executives and managers in the public sector and for those who hope to do business with them

this book captures and communicates the wealth of architecture experience capgemini has gathered as a member of the open group a vendor and technology neutral consortium formed by major industry players in developing deploying and using its integrated architecture framework iaf since its origination in 1993 today many elements of iaf have been incorporated into the new version 9 of togaf the related open group standard the authors all working on and with iaf for many years here provide a full reference to iaf and a guide on how to apply it in addition they describe in detail the relations between iaf and the architecture standards togaf and archimate and other development or process frameworks like itil cmmi and rup their presentation is targeted at architects project managers and process analysts who have either considered or are already working with iaf they will find many roadmaps case studies checklists and tips and advice for their daily work

the coverage in this edition of management information systems reflects the latest advances in mis tools and trends a wide selection of hands on practice exercises at the end of every chapter stimulates business problem solving skills and a supporting website provides interactive learning opportunities

this report documents work performed under fta s advance public transportation systems apts program a program structured to undertake research and development of innovative applications of advanced navigation information and communication technologies that most benefit public transportation this report presents the results of an analysis conducted by the volpe center for the fta to provide an order of magnitude estimate of the expected benefits to the transit industry with the application of apts technologies specifically the study identified and quantified the major benefits derived from current applications of apts technologies within the transit industry and projected current apts benefits to a national level based on forecasts and reasonable assumptions on the potential future applications of such technologies within the transit industry
