ultrasonic energy can be applied to surgical instruments for cutting dissecting and
coagulating vessels and or tissue this book presents the use of ultrasound energy as
it is used in ultracision products for use in surgery on many parts of the body
principles of ultracision technology the instruments are attached to a hand piece
which is connected to a generator the ultrasonic system is situated inside the hand
piece and transforms the electric energy into mechanical movement producing in
this way longitudinal vibrations of the blades at approx 55 khz per second the
movement of the blades causes collagen molecules to vibrate inside the tissues thus
forming a coagulum upon their denaturation this method is especially useful in
parenchymatous organs where dissection can be performed cleanly and with little or
no bleeding among the applications of ultracision are esophageal surgery reflex
surgery gastrectomy colorectal surgery for crohn s disease diverticulitis and cancer
laparoscopic cholecystectomy hepatic resection pancreatic surgery adrenalectomy
thyroid surgery hysterectomy and other gynecologic surgery and much more for
the general surgeon becoming acquainted with this highly effective new surgical
tool this book represents an ideal introduction including a step by step guide to
operative sequences and tips provided by those who have already gained
experience in the modality
