climate change is one of the most critical social and environmental concerns and the biggest threat to economic stability in human history. Türkiye, Azerbaijan, and Central Asia countries namely Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan are vulnerable to the negative impacts of climate change. Although average forest cover is only 10.2 percent of these countries' FAO SEC countries, they play an essential role in climate change mitigation and adaptation, including human well-being and biodiversity co-benefits. The NbS concept has gained attention since the late 2000s. Its practical contribution to global climate change mitigation and adaptation efforts has found significant implementation opportunities in forestry to support the protection and conservation, restoration and expansion, and sustainable management of forests under the impact of climate change. Globally implementing NbS to combat the negative impact of climate change on forestry is promoted by the United Nations Forum on Forests (UNFF), United Nations Framework Convention on Climate Change (UNFCCC), the Paris Agreement, United Nations Convention to Combat Desertification (UNCCD), Convention on Biological Diversity (CBD), the United Nations Human Settlements Programme (UN-Habitat), and the 2030 Agenda for Sustainable Development. Regionally, implementing NbS to combat the negative impacts of climate change on forestry has been included in the forest policy initiatives of the countries in the sub-region. Recently, as a result, governments have implemented NbS through national strategies and programs to address societal challenges by enhancing ecosystem services and promoting human well-being and biodiversity co-benefits. For example, Azerbaijan has implemented afforestation, reforestation, rehabilitation, and restoration activities in forest fund lands on an average of 9,727 hectares ha annually since 2000. Kazakhstan aims to save the Aral Sea basin from salinity and improve soil fertility through afforestation activities of saxaul species on 0.25 million ha, and the afforestation area in the Aral Sea will be extended by 1 million ha till 2025. Kyrgyzstan has planned a 1,000 ha annual plantation program to expand protected natural areas to 10 percent. Tajikistan implements 2,000 ha of annual plantation activities to increase the greenhouse gas (GHG) mitigation potential through participatory forestry sector development. Türkiye implemented afforestation, soil conservation, forest rehabilitation, pasture rehabilitation, private afforestation, artificial regeneration, and establishment of energy forests activities on 9,62 million ha from 1946 to 2022. Turkmenistan conducts afforestation activities with drought-resistant plant species and established the Golden Century Lake in the Karakum Desert to improve the climate conditions and conserve biodiversity. Uzbekistan declared the Aral Sea region

Master the fundamental concepts and applications of operations management and supply chain management (SCM) with *Operations and Supply Chain Management 3e* by award-winning authors Collier and Evans. This edition balances coverage of both manufacturing and service businesses with the latest updates, an additional new SCM chapter, and new discussions that highlight the latest changes in OM and SCM. Clear explanations are supported with contemporary examples and new and updated case studies that demonstrate how concepts apply. Discussions highlight new techniques and principles as well as the most recent Excel techniques and digital tools. Solved problems further guide you through key formulas and computations. MindTap online learning platform is available for both manual calculations and the use of Excel spreadsheet templates and models. MindTap's algorithmic homework and interactive learning tools also show you how to apply qualitative and quantitative reasoning to today's OM

and scm concepts
