the psychology and physiology of stress investigates the psychological and physiological consequences of stress caused by the vietnam war it includes the contributions of the representatives of the us armed forces and the army of the republic of vietnam furthermore it summarizes advances both in the clinical and research spheres that have evolved from the conflict this book begins with a brief historical review of psychiatric disorders associated with combat with emphasis on changes in their frequency terminology and manifestations it is followed by chapters dealing with the organization and development of us army psychiatry in vietnam psychiatry in the army of the republic of vietnam south vietnam forces and psychiatric disorders of marine and naval personnel who have been evacuated to an offshore based hospital ship the book also explains the patterns of psychiatric attrition and behavior in the combat zone steroid and other biochemical responses to combat stress which involve measurements of 17 hydroxycorticosteroids androgens and various phospholipid fractions heat stress in army pilots in vietnam background characteristics attitudes and self concepts of air force psychiatric casualties from southeast asia and stress and fatigue monitoring of naval aviators during aircraft carrier combat operations the book concludes with a chapter on progress in combat psychiatry after the vietnam war this book is a valuable resource for psychiatrists psychologists and healthcare and military personnel concerned with the effects of combat induced stress

excerpt from principles of mental physiology with their applications to the training and discipline of the mind and the study of

its morbid conditions when we come to examine the reasons latterly as signed by professor huxley for giving up this assured belief we find them mainly based on the fact that certain actions which would be ordinarily accounted volitional as being initiated by an intentional effort in man can be performed under circumstances which strongly indicate a about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

this is robert fried s third book on the crucial role of breathing and hyperventilation in our emotional and physical health the first the hyperventilation syndrome 1987 was a scholarly monograph and the second the breath connection 1990a was a popular version for the lay reader this book combines the best features of both and extends dr fried s seminal work to protocols for clinical psychophysiology and psy chiatry hoping to avoid misunderstanding he has taken systematic care to introduce relevant electrical physiological and psychological concepts in operational language for the widest possible professional audience any clinician not thoroughly experienced in respiratory psycho physiology and biofeedback will leave these pages with profound new insight and direction into an aspect of our lives which we innocently take for granted as common sense the role of breathing in health and illness einstein viewed such common sense as that set of prejudices we acquired prior to the age of eighteen i am impressed that dr fried mirrors einstein s uncanny genius in not accepting the obvious breathing is not common sense but rather is a pivotal psycho physiological mechanism underlying all aspects of life

a volume of selected articles from the teaching of psychology journal with tested ideas for infusing life into a psychology class vol ii focuses on physiology perception learning cognition development invaluable for instructors grad assist
