Lowes David E Lowes Union for Radical Political Economics. Crisis Reader Editorial Collective O. P. Ralhan Alfred Sidney Johnson Ezra Niesen Stein Ugelvik Larsen*

in this book ibrahim employs bourdieu s key concepts in order to explain the complex dynamics of social movements by detailing the key stages of development of and ideological conflict between 21st century british anti capitalist organizations and their interactions with wider social and political forces

anti capitalist britain is an account of the state of left and radical politics in the uk delivered through a study of recent anti capitalist protests and movements the book is a collaborative project involving writers from various universities in the uk and recent participants in anti capitalist actions book jacket

the great demonstrations at seattle and genoa have shown that we are in a new era of protest the neo liberal economic policies pursued by the group of seven leading industrial countries and the international institutions they control are provoking widespread resistance growing numbers of people in all five continents are rejecting the values of the market and the vision of a world made safe for the multinational corporations but what does the anti globalization movement stand for is it as its most common name suggests against globalization itself is it opposed merely to the neo liberal washington consensus that became dominant in the 1980s and 1990s or is its real enemy the capitalist system itself the world social forum at porto alegre has popularized the slogan another world is possible but what is that world alex callinicos seeks to answer these questions in an anti capitalist manifesto he analyses the development of the movement distinguishes between the different political forces within it and explores the strategic dilemmas notably over violence and the nation state that it increasingly confronts he argues

that the movement is directed against capitalism itself the logic of competitive accumulation that drives this system is not only increasing global inequality and economic instability but threatens ecological catastrophe and appalling conflict to meet the challenge of global capitalism the new protest movement requires according to callinicos a creative synthesis of its own inclusive and dynamic style and the best of the classical marxist tradition

every aspect of the anti capitalist world is covered in this helpful guide from wombles to zapatistas ngos to environmentalism paris 1968 to seattle and beyond picking up where naomi klein left off this is not so much a manifesto as a roadmap which captures the essence of the movement and also articulates a range of possibilities for future alternatives to the corporate domination of our planet

what does anticapitalism really mean for the politics and culture of the twenty first century anticapitalism is an idea which despite going global remains rooted in the local persisting as a loose collection of grassroots movements and actions anticapitalism needs to develop a coherent and cohering philosophy something which cultural theory and the intellectual legacy of the new left can help to provide notably through the work of key radical thinkers such as ernesto laclau stuart hall antonio negri gilles deleuze and judith butler anticapitalism and culture argues that there is a strong relationship between the radical tradition of cultural studies and the new political movements which try to resist corporate globalization indeed the two need each other whilst theory can shape and direct the huge diversity of anticapitalist activism the energy and sheer political engagement of the anticapitalist movement can breathe new life into cultural studies a pdf version of this book is available for free in open access via the oopen library platform oopen org

we are everywhere is a whirlwind collection of writings images and ideas for direct action by people on the frontlines of the global anticapitalist movement this is a movement of untold stories because those from below are not those who get to write history even though we are the ones making it we are everywhere wrenches our history from the grasp of the powerful and returns it to the streets fields and neighbourhoods where it was made

this dictionary is an alternative and a counter balance to the many political dictionaries that ignore or marginalize the history and influence of anti capitalist movements it paints a rich picture of the ideas and issues that inform today s anti capitalist activity anti capitalism has existed in many forms and with a variety of names since the advent of capitalism but this kind of oppositional force has often been ignored misrepresented or trivialised by many in the mainstream media and academia and by established political parties in the wake of the protests which started in seattle in 1999 the continuing dissent around the bush blair regimes and ongoing commitments to neo liberalism around the world the movement continues to flourish the anti capitalist dictionary is organised in an easily accessible alphabetical format with self contained cross referenced entries that introduce and explain concepts and issues that are integral to understanding today s global movement the dictionary demonstrates how the meaning and relevance of some of these have evolved and illustrates a linkage between past and present activity that might be unfamiliar to people who are involved or interested in the movement s current manifestations this dictionary has international coverage and will prove invaluable to students of politics as well as to activists and the general reader david lowes has a phd on the theory and practice of labour activism from liverpool john moores university he has been active in labour movement politics for over twenty years
