kenneth waltz s 1979 theory of international politics is credited with bringing about a scientific revolution in the study of international relations bringing the field into a new era of systematic study the book is also a lesson in reasoning carefully and critically good reasoning is exemplified by arguments that move systematically through carefully organised stages taking into account opposing stances and ideas as they move towards a logical conclusion theory of international politics might be a textbook example of how to go about structuring an argument in this way to produce a watertight case for a particular point of view waltz s book begins by testing and critiquing earlier theories of international relations showing their strengths and weaknesses before moving on to argue for his own stance what has since become known as neorealism his aim was to construct a theory of international politics that remedies the defects of present theories and this is precisely what he did by showing the shortcomings of the prevalent theories of international relations waltz was then able to import insights from sociology to create a more comprehensive and realistic theory that took full account of the strengths of old schemas while also remedying their weaknesses reasoning out a new theory in the process

originally published in 1993 this volume was unique in its scope and approach unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation the proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now among the topics discussed in the proliferation puzzle are the building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military they may be sought for defensive purposes or to support hegemonic aspirations nuclear weapons also raise questions about civilian command and control especially in crisis situations during the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime the decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally nuclear weapons were introduced at the time bipolarity became the international order as the world moves away from bipolarity there is a need to answer questions such as what would be the effect of nuclear weapons in a multipolar order how will the spread of nuclear weapons affect the distribution of capabilities among states if nuclear weapons spread to additional countries will they enhance stability or exacerbate instability can the spread of these weapons be

managed or controlled this book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread a disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking the purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy the essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations
