first published in 2002 the german dictionary of business commerce and
finance is the second dictionary to be published in routledge s programme of
bilingual business dictionaries the series was launched in december 1995
with the french dictionary of business commerce and finance it would not
have been possible to compile this dictionary within a relatively short
timescale and to the standard achieved without the use of a highly
sophisticated custom designed database the database s most significant
feature is that it is designed as a relational database term records for each
language are held in separate files with further files consisting only of link
records links between terms in different language files represent
translations enabling us to handle various types of one to many and many to
one equivalences links between terms within a single language file
represent crossreferences between geographical variants and abbreviations
the content of the database for this dictionary was created in three principal
phases a considerable proportion of the english term list was already

available following the publication of the french dictionary of business commerce and finance the term list was then sent out to specialist translators with current practical experience of business translation who supplied german equivalences and expanded the english and german term lists to include the main relevant terminology in their particular spheres of work

this dictionary consists of some 50 000 terms and references and 4 000 abbreviations in both german and english over 40 subject areas are covered including accountancy banking computing economics finance general commerce human resource management import export industry insurance law management mathematics media patents politics property sales marketing stock market taxation tourism welfare safety and many more
