edition preface by warren buffett in which he claims that this is the best investment book he has read does not hurt either in the introduction benjamin graham explains that the book presents principles for intelligent investing while warning that there are no foolproof ways to make money he names two types of investors the defensive and the enterprising the defensive investor is passive his chief purpose is to avoid making serious mistakes or losses while also putting in less effort and making less frequent decisions the enterprising investor is active or even aggressive he is more than willing to devote time and energy to selecting securities that are stable and more attractive than average graham explains that the enterprising investor may expect better returns for his extra effort over the course of a few decades but graham doubts that substantial gain is guaranteed for that investor he also details examples of how investment professionals the experts can and have been wrong for instance many investment companies favored airline stocks because they foresaw the number of travelers rising the premise for their faith in these stocks was true the number of frequent fliers did rise however the airlines themselves struggled to be profitable a the same time many of those investing professionals realized that computers would become ubiquitous for businesses at least but they were not certain of this growth in this field so they limited their investments in computer companies and did not necessarily privilege the one computer company that heavily paid off its investors which was ibm these examples lead graham to naming two morals that obviously good prospects for growth in a business do not translate into obvious profit for the investors and that the experts do not have dependable methods of selecting the most promising companies in the most promising fields this first moral that obviously good growth prospects do not translate into obvious profit needs further explanation if most investors are expecting massive growth in one industry than that industry would seem like the obvious one to invest in but the prices for its stocks have already increased from so many people buying it that its future returns must go down a stock becomes more risky as its price
