the contributors attempt to describe polish rivers and lakes as a nexus of narratives about nature culture pointing out those elements of the story around which scientific political media social and ecological narratives are created all of them influence the shape of reflection on the water ecosystem and its function in polish education the authors recreate old and contemporary polish mythmaking narratives about polish rivers and lakes and by proposing a critical reading of them try to develop new educational practices that would take into account the 21st century conditions related to the climate catastrophe the context related to the crisis also opens up thinking about rivers to other categories cooperation solidarity activism than those that have been applicable in polish education so far national symbolism utility

emerging challenges related to socio demographics and economics require new approaches for academics politicians hospital management clinical staff public institutions and firms doing business in the healthcare industries this book provides valuable insights for understanding modern and complex healthcare market configurations in europe taking a unique cross country perspective the authors figure out critical success factors for relevant stakeholders mario glowik is professor of international strategic management at the berlin school of economics and law he holds a doctorate in business administration from the freie universität berlin in germany and gained his habilitation post doctoral qualification at the vienna university of economics and business austria slawomir smyczek is marketing professor at the university of economics in katowice poland where he earned his ph d in 2010 the polish prime minister awarded his habilitation thesis as the best in the field of economics in the entire country

this book collects 15 papers written by renowned scholars from across the globe that showcase the forefront research in earth observation eo remote sensing rs and geoscientific ground investigations to study archaeological records and cultural heritage archaeologists anthropologists geographers remote sensing and archaeometry experts share their methodologies relying on a wealth of techniques and data including but not limited to very high resolution satellite images from optical and radar space borne sensors air borne surveys geographic information systems gis archaeological fieldwork and historical maps a couple of the contributions highlight the value of noninvasive and nondestructive laboratory analyses e g neutron diffraction to reconstruct ancient manufacturing technologies and of geological ground investigations to corroborate hypotheses of historical events that shaped cultural landscapes case studies encompass famous unesco world heritage sites e g the nasca lines in peru remote and yet to discover archaeological areas in tropical forests in central america european countries south asian changing landscapes and environments which are arid nowadays but were probably full of woody vegetation in the past finally the reader can learn about the state of the art of education initiatives to train site managers in the use of space technologies in support of their activities and can understand the legal aspects involved in the application of eo and rs to address current challenges of african heritage preservation

between freedom and security is an attempt at an interdisciplinary humanistic technical consideration of the problem of the need of the self realizing human being to meet the requirements imposed on him by among other things technical norms and legal regulations which in a certain sense form the framework for his functioning in a sense the limitation of the individual and his subjective reception of freedom recognizing that the need for freedom and the need for security are constitutive for the self realizing subject the contributors present the different aspects of security and the constraints associated with it and make suggestions for bridging the existing dissonance between what is objectively necessary and what is subjectively and individually justified

international migration and other types of cross border movement of people are becoming an important part of international relations in northeast asia in this particular study experts on china japan korea mongolia and russia examine the political economic social and cultural dimensions of the interaction between border crossing individuals and host communities highlighting the challenges that face national and local leaders in each country and suggesting needed changes in national and international policies the authors analyze population trends and migration patterns in each country chinese migration to the russian far east chinese koreans and russians in japan north koreans in china and migration issues in south korea and mongolia the book introduces a wealth of empirical material and insight to both international migration studies and northeast asian area studies

poland has been in a phase of change since 2015 the constitutional system of the third republic is being restructured the judiciary media schools and universities are the main focus of attention this restructure is being celebrated by the government as a renewal of the polish state but is being branded by the opposition as the destruction of the polish republic in favour of an illiberal democracy in this already very difficult situation poland was confronted with the major challenges posed by a pandemic what effects will the crisis have on the restructuring of the constitutional system at present it seems that the pandemic is acting as a catalyst for those changes this book aims to provide an informed commentary on those developments and what they mean for the third polish republic

urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process it is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global the book is a global assessment and delivers four main conclusions urban areas are expanding faster than urban populations half the increase in urban land across the world over the next 20 years will occur in asia with the most extensive change expected to take place in india and china urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services

the russian aggression on ukraine has drastically altered the migration situation in central and eastern europe cee drawing international attention despite numerous global studies on individuals seeking refuge cee remains underresearched this book details the recent lesser known experiences of countless forced migrants who arrived there given the pivotal role of information and telecommunication technologies icts for both migrants and host societies the book explores the intersection of icts and forced migration with this in mind the book focuses on poland czechia slovakia and hungary and uses comprehensive research and robust qualitative methods to demonstrate how these countries are emerging as new immigration destinations and handling the influx of ukrainians contributions from economists sociologists and political scientists provide a thorough examination of how ukrainian forced migrants navigate their lives using modern technologies as well as their impact on these technologies essential reading for academics policymakers and professionals in the fields of migration studies digital governance and european affairs this book uniquely highlights the vital role of icts in migration decisions journeys settlement and integration it provides a balanced mix of theoretical analysis and practical insights helping readers comprehend the interplay between icts and migration readers will obtain a better understanding of the challenges and opportunities that digital technologies bring in facilitating and regulating forced migration in this part of europe
