this book was the first to specifically address the impact of religion and spirituality on mental illness

neuromodulation in psychiatry neuromodulation in psychiatry this is the first comprehensive and detailed reference work that focuses on neuromodulation strategies in psychiatry neuromodulation strategies are no longer confined to tertiary hospitals but are used in community practices and even by individual psychiatrists surgery for psychiatric disorders is one of the main advances in the field of functional neurosurgery neuromodulation in psychiatry includes chapters on the history of this controversial field and the ethics of modern usage of such techniques specific chapters are devoted to neuromodulation and surgical strategies used in psychiatry including transcranial magnetic stimulation transcranial direct current stimulation vagus nerve stimulation direct cortical stimulation and deep brain stimulation a chapter describes the basic principles of each techniques using figures and schematics to illustrate details for people who do not have personal experience of using these techniques another chapter then focuses on the results of clinical research trials and applications for that strategy written by an expert multidisciplinary editorial team across the fields of neurosurgery psychiatry and neurology this title encompasses basic principles technical aspects and clinical applications including ethical considerations clearly explains each technique with implications for clinical practice presents evidence in a comprehensive summary suitable for all levels allows psychiatrists to evaluate results obtained using such strategies and to make decisions regarding the best course of treatment for their patients an essential reference guide for psychiatrists psychologists neurosurgeons neurologists and respective trainees the book is the first comprehensive reference work to cover all neuromodulation strategies now used or with potential use in psychiatry it allows psychiatrists to evaluate results obtained using such strategies and to make decision regarding the best course of treatment for their patients

this issue of psychiatric clinics guest edited by drs robert j boland and hermioni lokko amonoo will discuss a psychiatric education and lifelong learning this issue is one of four each year selected by our series consulting editor dr harsh trivedi of sheppard Pratt health system topics in this issue include types of learners incorporating cultural sensitivity into education the use of simulation in teaching computer based teaching creating successful presentations adapting teaching to the clinical setting teaching psychotherapy competency based assessment in psychiatric education giving feedback multiple choice tests the use of narrative techniques in psychiatry fostering careers in psychiatric education neuroscience education making it relevant to psychiatric training lifelong learning in psychiatry and the role of certification and advancing workplace based assessment in psychiatric education key design and implementation issues

the psychiatric profession must ensure that its next generation of leaders has the appropriate skills to provide mental health services in the face of globalization and urbanization new technologies and competing demands for shrinking resources developing leadership skills and leaders is critical in order to optimise the use of resources their application service planning and delivery of services for patients and their families this is the first book on leadership rather than management skills to focus on psychiatry and mental health care contributions from international experts with clinical and non clinical backgrounds pull together the theories and practical skills required to be a successful leader the aim is to guide mental health professionals in general and psychiatrists in particular on how to gain the relevant skills and on how to utilise these skills and training to take on leadership roles in clinical and organisational settings the book covers the role of the leader and the skills required for leadership including chapters on communication decision making team development mentoring gender issues in leadership burnout and more it includes a section on assessment tools and learning material essential reading for all those who aspire to lead in psychiatry

this book offers trainee psychiatrists vital guidance on how to succeed in the pmp section of their exams it will be ideal for the membership of the royal college of psychiatrists and similar exams

this scarce antiquarian book is a facsimile reprint of the original due to its age it may contain imperfections such as marks notations marginalia and flawed pages because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world's literature in affordable high quality modern editions that are true to the original work

this book is the newest edition on the series advances in psychiatry the previous 3 volumes can be found online at wpanet or php section id 10 content id 660 they were highly successful in covering a broad area of psychiatry from different perspectives and angles and by reflecting both specialized but also international and global approaches this series have guaranteed quality therefore can be used by different scientific groups for teaching and learning and also as a means for fast dissemination of advanced research and transformation of research findings into the everyday clinical practice

in psychiatry there is no sharp boundary between the normal and the pathological although clear cases abound it is often indeterminate whether a particular condition does or does not qualify as a mental disorder for example definitions of subthreshold disorders and of the prodromal stages of diseases are notoriously contentious philosophers and linguists call concepts that lack sharp boundaries and thus admit of borderline cases vague although blurred boundaries between the normal and the pathological are a recurrent theme in many publications concerned with the classification of mental disorders systematic approaches that take into account philosophical reflections on vagueness are rare this book provides interdisciplinary discussions about vagueness in psychiatry by bringing together scholars from psychiatry psychology philosophy history and law it draws together various lines of inquiry into the nature of gradations between mental health and disease and discusses the individual and societal consequences of dealing with blurred boundaries in medical practice forensic psychiatry and beyond part i starts with an overview chapter that helps readers to navigate through the philosophy of vagueness and through the various debates surrounding demarcation problems in the classification and diagnosis of mental illness part ii encompasses historical and recent philosophical positions on gradualist approaches to health and disease part iii approaches the vagueness of present psychiatric classification systems and the debates concerning their revision by scrutinizing controversial categories such as post traumatic stress disorder and by looking into the difficulties of day to day diagnostic and therapeutic practice part iv finally focuses on social moral and legal implications that arise when being mentally ill is a matter of degree

landmark papers in psychiatry traces the evolution of psychiatry as a scientific discipline by summarizing over 100 watershed psychiatric papers this text gives historical context to the research trajectory of psychiatry

a short introduction to psychiatry is designed to give readers a clear picture of the profession of psychiatry as it is today as well as an understanding of the subject from which to develop further study the author describes the development of the profession the route to qualification and the scope of contemporary practice including the work done by psychiatrists in a range of specialisms from child psychiatry to addiction services and forensic psychiatry drawing on the experience of people who have been through psychiatric treatment the book also explores what psychiatry is like from the patient s user s perspective many criticisms have been levelled against the profession and the author linda gask summarizes key debates which have been and continue to be played out between psychiatry s

critics and its defenders a short introduction to psychiatry is for anyone looking into psychiatry for the first time whether with a view to training or out of more general interest

this book focuses on hot issues faced by clinicians in everyday clinical practice and provides in depth analyses of both met and unmet needs in the management of psychiatric disorders it has been repeatedly shown that the needs of patients relatives the community at large and those of the governmental bodies only partially overlap for instance patients in their families are more concerned about quality of life treatment autonomy and independent living whereas governmental stakeholders are typically more concerned about relapse prevention and reduction of hospitalizations as such a volume bridging the gap between theoretical notions and practical understanding of patients untreated aspects of their psychiatric disorders is much needed instead of focusing on traditional descriptions of psychopathology and diagnostic criteria the volume guides readers to core problems for each topic taking into account new approaches in the classification of mental disorders as proposed by dsm 5 it elaborates on much debated controversial problems such as the assessment and treatment of psychomotor agitation and non adherence to treatment that impacts on the psychiatric context with its unique approach this volume appeals to anyone with an interest in the field including researchers clinicians and trainees
