winner of the modernist studies association book prize of the modernist studies association in this highly original study jeremy braddock focuses on collective forms of modernist expression the art collection the anthology and the archive and their importance in the development of institutional and artistic culture in the united states using extensive archival research braddock s study synthetically examines the overlooked practices of major american art collectors and literary editors albert barnes alain locke duncan phillips alfred

kreymborg amy lowell ezra pound katherine dreier and carl van vechten he reveals the way collections were devised as both models for modernism's future institutionalization and culturally productive objects and aesthetic forms in themselves rather than anchoring his study in the familiar figures of the individual poet artist and work braddock gives us an entirely new account of how modernism was made one centered on the figure of the collector and the practice of collecting collecting as modernist practice demonstrates that modernism's cultural identity was secured not so much through the selection of a canon of significant works as by the development of new practices that shaped the social meaning of art braddock has us revisit the contested terrain of modernist culture prior to the dominance of institutions such as the museum of modern art and the university curriculum so that we might consider modernisms that could have been offering the most systematic review to date of the barnes foundation an intellectual genealogy and analysis of the new negro anthology and studies of a wide range of hitherto ignored anthologies and archives braddock convincingly shows how artistic and literary collections helped define the modernist movement in the united states

the first book length study of women s involvement in the chicano movement of the late 1960s and 1970s chicana power tells the powerful story of the emergence of chicana feminism within student and community based organizations throughout southern california and the southwest as chicanos engaged in widespread protest in their struggle for social justice civil rights and self determination women in el movimiento became

increasingly militant about the gap between the rhetoric of equality and the organizational culture that suppressed women's leadership and subjected women to chauvinism discrimination and sexual harassment based on rich oral histories and extensive archival research. Maylei Blackwell analyzes the struggles over gender and sexuality within the Chicano movement and illustrates how those struggles produced new forms of racial consciousness, gender awareness, and political identities. Chicana Power provides a critical genealogy of pioneering Chicana activist and theorist Anna Nieto Gomez and the Hijas de Cuauhtémoc, one of the first Latina feminist organizations who together with other Chicana activists forged an autonomous space for women's political participation and challenged the gendered confines of Chicano nationalism in the movement and in the formation of the field of Chicana studies. She uncovers the multifaceted vision of liberation that continues to reverberate today as contemporary activists, artists, and intellectuals both grassroots and academic struggle to revise and rework the political legacy of Chicana feminism.
