the 6th edition of Jubb, Kennedy and Palmer's *Pathology of Domestic Animals* continues the long tradition of this classic set of volumes as the most comprehensive reference book published on the topic of pathology of the common domestic mammals with emphasis on disease conditions of cattle and small ruminants, swine, horses, dogs and cats using a body systems approach. Recognized authorities in their fields provide overviews of general characteristics of the system reactions to insult and disease conditions broken down by type of infectious or toxic insult affecting the anatomical subdivisions of each body system. Since the publication of the 4th edition in 1993, much has changed. Disease agents such as bovine viral diarrhoea virus (BVDV) type 2, porcine reproductive and respiratory syndrome virus (PRRSV), porcine circovirus 2, Hendra virus and *Leptospira* spp. have emerged or further evolved. Molecular based testing including polymerase chain reaction (PCR) and in situ hybridization have allowed further understanding of pathogenesis of disease and have greatly furthered our diagnostic capabilities. Updated content includes new and evolving pathogens and diagnostic techniques. Updated bibliographies give readers new entry points into the rapidly expanding literature on each subject. New high resolution color images clearly depict the diagnostic features of hundreds of conditions. New introduction to the diagnostic process chapter illustrates the whole animal perspective and details the approaches to systemic, multi-system and polymicrobial disease. New coverage of camelids is now included in the reference. Widened scope of species. New team of 30 expert contributors offers the latest perspective on the continuum of issues in veterinary pathology. New expanded resources on the companion website include a variety of helpful tools such as full reference lists with entries linked to abstracts in PubMed and bonus web only figures. New full color design improves the

accessibility of the text
