aging research on the human eyes crosses all areas of ophthalmology and also relies upon biological morphological physiological and biochemical tools for its study in age related changes of the human eye the authors review all aspects of human eye aging in addition to descriptions of age related changes in almost all the structures of the human eyes the authors also include interesting accounts of personal experiments and data the ease of use and versatility of this volume makes it an essential tool for students and graduate students as well as post doctoral and or professional ophthalmologists age related changes of the human eye provides the reader with an exhaustive panorama of what happens during aging in the eye thus making an important contribution to the understanding of the physiology and pathology of eye diseases

this textbook describes several diseases and clinical conditions from physiopathological mechanisms to main clinical pictures highlighting the importance of laboratory medicine with the aim to provide the necessary tools for guiding correct laboratory findings interpretation indeed it is now widely recognized that laboratory medicine has a pivotal role in clinical medicine significantly influencing clinical decisions thus it is crucial to understand and use laboratory data appropriately this book has the great advantage of describing each topic exhaustively in order to facilitate its understanding specifically it describes both diseases with a high incidence in the population such as diabetes mellitus cardiovascular diseases dyslipidemias and autoimmune diseases as well as rare diseases such as hereditary metabolic diseases in addition unusual topics are treated such as clinical biochemistry of the mind as well as hot topics such as biological

drugs biobanks health technology assessment and omics sciences finally the book includes a chapter on the new health emergency the sars cov 2 pandemic two appendices are provided at the end of the book a table summarizing the reference range and decisional cut off for the main laboratory parameters and instructions on performing a venous blood sample the book will be an invaluable tool for medical and biomedical students as well as for practitioners

in this updated reissue of their classic homeopathy a frontier in medical science italian physicians paolo bellavite and andrea signorini thoroughly examine previous and current literature on the science of homeopathy in order to discover answers to the elemental questions about homeopathy bellavite and signorini engage in a fascinating discussion of the biophysics of water biological effects of electromagnetic fields chaos theory and fractals

this book aims to provide specialists and practitioners with a reliable source of information on all aspects of peyronie s disease which is too often still considered a mysterious condition the focus is in particular on those aspects of the disease that are most hotly debated including etiology risk factors nosology natural history and medical therapy clear guidance is also provided on surgical techniques with explanation of why and when to apply plication surgery corporoplasty and plaque surgery and the best approach to complicated cases throughout strenuous efforts have been made to ensure clarity and simplicity of expression and ease of consultation while clear international guidelines are lacking this has allowed the authors to devote much space to personal ideas conveying the fascinating and sometimes conflicting nature of this field of medicine and hopefully stimulating further research

this book clearly explains when and how different rehabilitation techniques should be applied in the aging patient thereby enabling readers to identify and apply those rehabilitation strategies that will maximize quality of life and functional independence in individual cases it is specifically

designed for ease of consultation and rapid retrieval of the information most relevant to clinical practice prominence is given to the benefits of a multidisciplinary approach to rehabilitation with discussion of a very wide range of aspects of rehabilitation in different disease settings the breadth of coverage is illustrated by the attention paid to less commonly addressed topics such as visual and hearing rehabilitation the role of robotics and 3d imaging techniques variations in approach among health care systems and rehabilitation in end of life care the authors are international academic experts in their fields guaranteeing a high scientific standard throughout this manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians practitioners and students

the title of this book might somehow sound as if it is related to a work of psychology but it is actually a book about health all physical diseases chronic pain fibromyalgia anxiety depression diabetes obesity and overweight have a very close connection with progressive acidification of the body health and wellbeing can exist only when a slightly alkaline extracellular matrix the entirety of the spaces between our cells exists dr andrea grieco is a specialist in neurology and nephrology he has dedicated his entire professional life to the study of fibromyalgia and in this book he clearly and thoroughly explains the relationship between acidosis and all body mind dysfunctions this book is founded on three pillars helping suffering people to regain wellbeing and health sharing the knowledge and experiences regarding the alkalization of the extracellular matrix and clarifying a subject that is often surrounded by misinformation and statements unsupported by scientific thought reading will be like a journey within our organism and its deepest functioning mechanisms where illnesses begin but also where our self healing power and our well being begins
