this book is not a forecast it is a structural analysis of a society under growing internal pressure the coming collapse offers a measured examination of the economic political social and ecological stressors shaping the current trajectory of the united states and the broader global system drawing on contemporary data historical precedent and systems theory it considers what collapse looks like not as a dramatic singular event but as a gradual and uneven process already underway rather than identifying a single cause or tipping point the book traces patterns of institutional fragility resource depletion public disaffection and systemic inertia it examines how modern societies maintain the appearance of stability even as underlying capacities degrade this is not a work of speculation or ideology it is an attempt to clarify conditions as they are while that clarification is still possible for those seeking to understand why so much feels unsustainable fragmented or out of step with official narratives the coming collapse offers a clear and credible framework for interpreting the world of 2025
