this book is not a forecast it is a structural analysis of a society under growing internal pressure the coming collapse offers a measured examination of the economic political social and ecological stressors shaping the current trajectory of the united states and the broader global system drawing on

contemporary data historical precedent and systems theory it considers what collapse looks like not as a dramatic singular event but as a gradual and uneven process already underway rather than identifying a single cause or tipping point the book traces patterns of institutional fragility resource depletion public disaffection and systemic inertia it examines how modern societies maintain the appearance of stability even as underlying capacities degrade this is not a work of speculation or ideology it is an attempt to clarify conditions as they are while that clarification is still possible for those seeking to understand why so much feels unsustainable fragmented or out of step with official narratives the coming collapse offers a clear and credible framework for interpreting the world of 2025

with the world in turmoil and all air and sea traffic to america suspended laine must rely on his own ingenuity and the help of good samaritans to reach his family and over everything looms the threat of a provisional government determined to take over america

the gulf monarchies saudi arabia and its five smaller neighbours the united arab emirates kuwait qatar oman and bahrain have long been governed by highly autocratic and seemingly anachronistic regimes yet despite bloody conflicts on their doorsteps fast growing populations and powerful modernising and globalising forces impacting on their largely conservative societies they have demonstrated remarkable resilience obituaries for these traditional monarchies have frequently been penned but even now these absolutist almost medieval entities still appear to pose the same conundrum as before in the wake of the 2011 arab spring and the fall of incumbent presidents in egypt tunisia and libya the apparently steadfast gulf monarchies have at first glance reaffirmed their status as the middle east's only real bastions of stability in this book however noted gulf expert christopher davidson contends that the collapse of these kings emirs and sultans is going to happen and was always going to while the revolutionary movements in north africa syria and yemen will undeniably serve as important if indirect catalysts for the coming upheaval many of the same socio economic pressures that were building up in the arab republics are now also very much present in the gulf monarchies it is now no longer a matter of if but when the west's steadfast allies fall this is a bold claim to make but davidson who accurately forecast the economic turmoil that afflicted dubai in 2009 has an enviable record in diagnosing social and political changes afoot in the region
