first published in 1994 routledge is an imprint of taylor francis an informa company

this volume is dedicated to horst todt who celebrated his seventieth anniversary on march 14 2000 all the contributors know horst todt personally and with the exception of two younger co authors have accompanied his scientific career for several years some as his assistants some as his colleagues at the frankfurt or hamburg university some as fellow members in scientific societies all who know him acknowledge inspiring conversations on a broad field of issues often reaching far beyond the scope of economics being friendly and entertaining and without exaggerated personal ambition he often initiated work which others completed in particular the two editors of this volume experienced and enjoyed the stimulating atmosphere at his chair of economics at the hamburg university we like to remember these scientifically and personally fruitful years under the tutorship of horst todt the editors would like to thank the contributors to this volume for their readiness to cooperate and for the promptness of their delivery

a collection of previous published papers by the author on the subject of complexity economics appearing from the 1980s to the present

conspiracy theories are inevitable in complex human societies and while they have always been with us their ubiquity in our political discourse is nearly unprecedented their salience has increased for a variety of reasons including the increasing access to information among ordinary people a pervasive sense of powerlessness among those same people and a widespread distrust of elites working in combination these factors and many other factors are now propelling conspiracy theories into our public sphere on a vast scale in recent years scholars have begun to study this genuinely important phenomenon in a concerted way in conspiracy theories and the people who believe them joseph e uscinski has gathered forty top researchers on the topic to provide both the foundational tools and the evidence to better understand conspiracy theories in the united states and around the world each chapter is informed by three core questions why do so many people believe in conspiracy theories what are the effects of such theories when they take hold in the public what can or should be done about the phenomenon combining systematic analysis and cutting edge empirical research this volume will help us better understand an extremely important yet relatively neglected phenomenon

this is a sequel to the book by dr a ashimov and his colleagues macroeconomic analysis and economic policy based

on parametric control the authors have expanded both the developed mathematical apparatus and the scope of problems and applications stemming from the practice of steering a national economy of a small country in the dynamic environment of the international economic order the developed theoretical foundation is used in chapter 1 to suggest a decision support system operating in the framework of state economic policy making chapter 2 presents various mathematical models built on the basis of the available statistical data and provides quality assessment of these models parametric control problems are being formulated on the basis of these models as problems of mathematical programming and the obtained solutions are subjected to analyses and interpretations this is demonstrated by the analysis of the effect of uncontrollable factors on the problem solutions chapter 3 is aimed at the modelling and analysis of cyclic phenomena in economics and their structural stability chapter 4 presents solutions of specific problems of national economy and analysis and interpretation of their solutions in summary the authors formulate comprehensive mathematical models of some critical mechanisms in micro economics previously known only on a qualitative level they provide vigorous mathematical analysis of the models that justifies their applicability for the formulation of parametric control problems and the existence of model based solutions the complexity of the resultant problems is addressed by the formulation of the appropriate algorithms the described methodology leads to the development of computer based decision support systems

the interconnections of economy society and politics so obviously determine socio economic and political structures and problem situations current ways of thinking and acting as well as the collective perception of solution options that their still low attention in university teaching and school education is surprising phenomena such as pandemics climate change migration or authoritarianism make the close complex and contradictory connections between economy society and politics tangible against this background socioeconomic research teaching and education are urgently needed the theme volume aims to contribute to this by presenting research contributions on problem complexes such as economy and democracy perspectivity and multiperspectivity situation interest and politics subject and subjectification and discipline and curriculum

contains papers that appeal to a broad and global readership in all fields of economics

this text reader focuses on laws and government solutions top down solutions in the u s that have been effective in

solving problems the readings explore specific examples of progressive legislation and social policies and also examines historical trends and future prospects
