the philosophy of quality assurance in the blood bank h f taswell one year before this symposium cees smit sibinga and i began to discuss an approach to quality assurance in the blood bank which we felt would be both important and practical and could serve as the basis for the choice of subjects to be presented in the symposium as an introduction to this book i would like to

outline our approach the subjects chosen and the rationale behind our choice what is the fundamental purpose of a blood bank and trans fusion service simply stated the purpose of a blood bank and transfusion service and of a quality assurance program in blood banking is for the one to provide and the other to assure safe and effective transfusion therapy this objective is in contrast to that of other clinical laboratories the objective in a clinical chemistry laboratory is to produce accurate test results which will be meaningful to the clinician taking care of his patient in most clinical laboratories therefore the goals of a quality assurance program are largely quantitative that is to assure accurate numerical test results in contrast in the blood bank the goals of quality assurance are primarily qualitative that is to assure safe and effective transfusion as a result two somewhat different approaches to quality assurance are necessary

ever since the discovery of blood types early in the last century transfusion medicine has evolved at a breakneck pace this second edition of blood banking and transfusion medicine is exactly what you need to keep up it combines scientific foundations with today s most practical approaches to the specialty from blood collection and storage to testing and transfusing blood components and finally cellular engineering you ll find coverage here that s second to none new advances in molecular genetics and the scientific mechanisms underlying the field are also covered with an emphasis on the clinical implications for treatment whether you re new to the field or an old pro this book belongs in your reference library integrates scientific foundations with clinical relevance to more clearly explain the science and its application to clinical practice highlights advances in the use of blood products and new methods of disease treatment while providing the most up to date information on these fast moving topics discusses current clinical controversies providing an arena for the discussion of sensitive topics covers the constantly changing approaches to stem cell transplantation and brings you the latest information on this controversial topic

proceedings of the tenth annual symposium on blood transfusion groningen 1985 organized by the red cross blood bank groningen drenthe
