in clinical assessment and diagnosis in social work practice seasoned practitioner  
scholars jacqueline corcoran and joseph walsh provide an in depth exploration of  
sixteen major mental disorders that social workers commonly see in practice including  
anxiety disorders depression bipolar disorder and schizophrenia they skillfully integrate  
several perspectives in order to help practitioners meet the challenges they will face in  
client assessment and present a risk and resilience framework that helps social workers  
understand environmental influences on the emergence of mental disorders and the  
strengths that clients already possess the authors also catalog the latest evidence  
based assessment instruments and treatments for each disorder so that social workers  
can intervene efficiently and effectively using the best resources available students  
and practitioners alike will appreciate the wealth of case examples evidence based  
assessment instruments treatment plans and new social diversity sections that make  
this an essential guide to the assessment and diagnostic processes in social work  
practice

this much needed volume brings to the clinician or student some of the best critical  
minded analysis by some of the most insightful thinkers about psychiatric diagnosis  
today the thought provoking questions these essays raise and the multifaceted and  
provocative answers they provide cultivate sensitivity to the nuances of diagnostic  
assessment that often makes the difference between clinical success and failure

this transformative resource challenges social workers and mental health professionals to rethink their approaches to assessment and diagnosis from the ground up among the book's unique features are its use of diverse lenses to examine a common case and its illustration of how multiple perspectives can be integrated for a richly textured portrait of the individual in context equally crucial is the book's commitment to professional development from exercises to improve case conceptualization to strategies for teaching and learning topics include the dsm 5 definition of mental disorder critique and alternatives making assessment decisions macro mezzo and micro perspectives neuroscience resilience and the embodiment of mental disorder narrative psychodynamic and cultural conceptualizations of disorder person centered and contextualized diagnosis in mental health meeting the challenge of teaching integrated assessment critical thinking in clinical assessment and diagnosis has much to offer professionals researchers and educators in the fields of social work and mental health

the sixth edition of diagnosis and evaluation in speech pathology continues to be the leading text in its field providing a practical process approach to diagnosing and evaluating speech and language disorders this easy to read yet comprehensive resource provides a strong foundation of diagnosis and evaluation for students in training and clinicians alike it develops a rationale for each type of assessment including both standardized and non standardized approaches this text is ideal for practitioners and clinicians who are struggling to stay in tune with the rapidly changing field of speech language pathology

during the past two or three decades research in cognitive science and psychology has yielded an improved understanding of the fundamental psychological nature of knowledge and cognitive skills that psychological testing attempts to measure these theories have reached sufficient maturity making it reasonable to look upon them to provide a sound theoretical foundation for assessment particularly for the content of assessments this fact combined with much discontentedness over current testing

practices has inspired efforts to bring testing and cognitive theory together to create a new theoretical framework for psychological testing a framework developed for diagnosing learners differences rather than for ranking learners based on their differences this volume presents some initial accomplishments in the effort to bring testing and cognitive theory together contributors originate from both of the relevant research communities cognitive research and psychometric theory some represent collaborations between representatives of the two communities others are efforts to reach out in the direction of the other community taking fundamentally different forms psychometric test theory assumes that knowledge can be represented in terms of one or at most a few dimensions whereas modern cognitive theory typically represents knowledge in networks either networks of conceptual relationships or the transition networks of production systems cognitively diagnostic assessment is a new enterprise and it is evident that many challenging problems remain to be addressed still it is already possible to develop highly productive interactions between assessment and instruction in both automated tutoring systems and more conventional classrooms the editors hope that the chapters presented here show how the reform of assessment can take a rigorous path

although the theory and methods of organization development od assessment and diagnosis have been covered in other books there is a lack of practitioner focused guides that introduce real world case studies and tools rooted in the methodology this book will fill that gap providing practical perspective and insight from practitioners and consultants currently practicing od assessment and diagnosis organization development od differs from management consulting in that od assessment and diagnosis is not a prescriptive consulting engagement instead od methods include engaging clients to build change leadership initiatives customized to their particular situation od is not about a consultant telling a client company what to do it is about an od professional guiding client companies on their journey towards the best end point for their particular situation this book will address that journey the theory and foundational principles of od are covered but the primary focus is on providing

practical applications to businesses while the book is grounded in sound academic theory its strength is its practitioner focused methodology containing vignettes and tools that individuals can use to help guide the assessment and diagnosis efforts in their own or their client organizations
