this insightful handbook reviews the key frameworks guiding political scientists and historians of political thought comprehensive in scope it covers historical methodology traditions epochs and classic authors and texts spanning from ancient greece until the nineteenth century

this book explores the significance of rhetoric from the perspective of its complex relationship with philosophy it demonstrates how this relationship gives expression to a basic tension at the core of politics that between the contingency of its happening and the transcendence toward which it strives the first part of the study proposes a reassessment of the ancient quarrel between philosophy and rhetoric as it was discussed by plato aristotle and above all cicero and quintilian who ambitiously attempted to bring them together creating an ideal that is at the roots of the humanist tradition it then moves to twentieth century political theory and shows how the questions that emerge from that quarrel still strongly resonate in the works of key thinkers such as h arendt i strauss and rorty the volume thus offers an original contribution that locates itself at the intersection of politics rhetoric and philosophy

this book takes a non technical approach in covering the evolution of south american

mammalian fauna throughout geological history and discusses how south america has changed due to mammalian invasions unlike other works on the subject this book attempts to answer several crucial questions that often go unmentioned together in one cohesive monograph what was the fauna like before the american interchange what were the origins of the now extinct groups when northern species arrived and out competed them how did the modern mammalian fauna come into being with such disparate animal groups this information is given from a historical perspective throughout the book s 15 chapters and is presented in an easily graspable fashion by mostly avoiding technical language the book is written for academics scientists and scholars engaged in paleontology zoology and evolutionary biology but may also appeal to a larger audience of general readers interested in mammalian evolution the book begins with an introduction describing the tools necessary to interpret the evolutionary history of south american mammals in geological terms and some of the early people who helped found south american mammalian paleontology chapter 2 describes the mesozoic first mammals of gondwana and what we are learning about them dominant before the k t extinction event then chapters 3 through 8 cover the cenozoic or age of mammals highlighting the major mammalian groups of south america that replaced the earlier mammals of gondwana these groups include the marsupials native ungulates the xenarthrans armadillos anteaters sloths the caviomorphs rodents and the platyrhine monkeys chapters 9 and 10 address the antarctic la meseta fossils and the colombian la venta fossil faunal assemblages chapter 11 discusses the neotropical mammals that invaded the caribbean islands and illustrates the influence south america has had on adjacent faunas chapter 12 describes the origin of the amazon river and the role it has played in the evolution of the mammals and other flora and fauna chapter 13 tells the story of the great american biotic interchange gabi and chapter 14 follows this up with a discussion of the pleistocene mammal communities and their eventual extinction chapter 15 concludes the text by discussing the modern mammals of south america and how despite the extensive pleistocene extinctions there is still a lot of mammalian diversity in south america

a pdf version of this book is available for free in open access via tandfebooks com as well as the oopen library platform oopen org it has been made available under a creative commons attribution non commercial no derivatives 3 0 license and is part of the oopen uk research project this book considers the relationship between hayek and mill taking issues with hayek s criticism of mill and providing a broader perspective of the liberal tradition featuring contributions from the likes of ross emmett leon montes and robert garnett these chapters ask whether hayek had an accurate reading of the ideas of mill and smith as well as considering themes such as sympathy and analytical egalitarianism that play a large part in the liberal tradition but less in work of hayek these chapters argue that addition of these key ideas to the hayekian corpus leads to a far broader understanding of the liberal tradition than that provided by hayek

the political philosophy of leo strauss has been the subject of significant scholarly and media attention in recent years particularly in the context of the decision to invade iraq in 2003 allegations that a group of strauss inspired neo conservatives intervened in the foreign policy establishment of the us in order to realise the policy of regime change began to emerge soon after the invasion and unanswered questions remain a decade later this book addresses these claims focusing specifically on a group of straussians active in the spheres of intelligence production think tanks and the media during the period from the 9 11 attacks to the invasion in 2003 such an examination is intended not simply to identify and expose their activities promoting the policy of regime change in iraq during this period but also to challenge them and the straussian logics underpinning them utilising the thought of jacques derrida the book enacts a deconstructive challenge to strauss political philosophy which unsettles the fundamental assumptions it relies upon in doing so it

exposes the securitising imperative underpinning straussian thought and the straussian interventions it thereby simultaneously addresses crucial issues in political theory and contemporary foreign policy studies while asserting that these dimensions of international politics can and should be dealt with in conjunction with each other this book would be of interest to students and scholars of global politics political theory security studies and us foreign policy and those outside the academy interested in neo conservatism and the 2003 invasion of iraq
