the USS Texas was built when dreadnought battleships were kings of the seas. It was the world's most powerful battleship when first commissioned in 1914 and for over a century it fought many battles. Some took place while the Texas served as a warship in the US Navy in World Wars I and II. Since becoming a museum ship and war memorial in 1948, it has fought a longer and more difficult struggle as it combats the ravages of time for its very survival. Throughout its existence, the Texas has made history, leaving a wealth of fascinating stories in its wake.

this pictorial history of us battleships illustrates the power versatility and many combat operations of this naval stalwart across the 20th century between 1895 and 1944 the us navy commissioned some 60 steel clad battleships from the uss indiana bb 1 to the uss missouri bb 63 after an impressive showing in the spanish american war and the great white fleet's circumnavigation of the world us battleships played only a minor role in the first world war they came into their own in world war ii bombarding enemy held coastal regions facing off against their japanese counterparts and providing essential protection of aircraft carriers their armor at nearly a foot and a half thick saved many lives in the face of suicidal kamikaze pilots after world war ii battleships were relegated to war reserve status but their conversion to platforms for cruise missiles gave them a vital new role the last us battleship retired in 1992 having served in korean vietnam and iraq combining rare wartime photographs and authoritative text by military expert michael green battleships of the united states navy gives the expert and layman a detailed overview of one of the greatest weapon systems in military history

in the hundreds of books written about battleships the authors tend to draw down the curtain on the careers of these great vessels in september 1945 with the surrender of japan yet on that day some ninety eight battleships or ex battleships might be spotted around the world and eleven of them were in or around tokyo bay for the surrender itself what happened to all those ships this new book takes a fresh look at the slow demise of the battleship it examines the decisions made by the major world powers after 1945 and their aspirations to retain battleships in their navies despite financial stringency it places the history and role of battleships after 1945 in their geo political context centered around the cold war and the need for the west to face down an aggressive soviet union it also examines the impact on battleships of operational analysis of the second world war and new technological developments notably the atom bomb and the guided missile the book uses the wealth of information from ship's books ship's logs and gun logs to document in considerable detail what the ships actually did after the second world war with a particular focus on those of the royal navy it covers united states battleship operations in korea vietnam and the gulf war as well as the deterrent role played by battleships for nato from the 1950s to the 1990s finally it brings the story up to date by documenting the preservation as museum ships of the eight dreadnoughts which still exist today in the united states extensively illustrated with photographs of the huge range of activities of battleships after 1945 from their use as fleet flagships to royal or presidential yachts and more poignantly as target ships this new book will appeal equally to the historic ship enthusiast and naval specialist and provide a novel perspective through a battleship shaped lens on late twentieth century history for the more general reader
