this is the third edition of the european workshop on microelectronics education ewme a steady state regime has now been reached an international community of university teachers is constituted they exchange their experience and their pedagogical tools they discuss the best ways to transfer the rapidly changing techniques to their students and to introduce them to the new physical and mathematical concepts and models for the innovative techniques devices circuits and design methods the number of abstracts submitted to ewme 2000 about one hundred enabled the scientific committee to proceed to a clear selection ewme is a european meeting indeed authors from 20 different

European countries contribute to this volume nevertheless the participation of authors from Brazil, Canada, China, New Zealand and USA shows that the workshop gradually attains an international dimension. The 20th century can be characterized as the century of the electron. The electron as an elementary particle was discovered by J. J. Thomson in 1897 and was rapidly used to transfer energy and information thanks to the electron universe and microcosmos could be explored. The electron became the omnipotent and omnipresent almost immaterial angel of our world. This was made possible thanks to electronics and for the last 30 years to microelectronics. Microelectronics not only modified and even radically transformed the industrial and the everyday landscapes but it also led to the so-called information revolution with which begins the 21st century.

This book serves the long felt need of trainers of social development particularly those organising training in child development, child welfare, social welfare, community development, rural development both for the functionaries of voluntary organisations and the government. The whole process of training has been broken into three parts: management, methodology and research and evaluation. Besides an introductory part, the management part deals with planning, organising and co-ordinating the programme which are crucial prerequisites for the success of training. Methodology of training emphasises the selection of trainees suitable for a particular job, course, essentiality of a professionally qualified trainer capable of influencing the learning process and using a variety of methods of training and aids. Research and evaluation include innovating new methods and aids with reference to the requirement of a particular topic and making analysis of the extent of achievement for the objectives of a programme, course, identifying the problem areas and searching for their solution. Role of standards and accreditation has also been discussed to help the trainers to make an objective assessment of the achievements in preparing the trainees to equip them suitably to the job responsibilities.

This report presents partial findings from the DoD Cost Factor Project. Volume 1 (R 4078 2) Part A describes the Army decision-making process and this volume describes data sources and methods used to develop cost factors. Cost factors are measures used to estimate the cost implication of changes in defense missions, force structures, weapon systems or operating levels. They include recurring operating and support costs, nonrecurring operations and maintenance costs and investments costs such as facility construction. The study also examines intermediate factors such as personnel pay rates that are used to develop cost estimates.
