david seedhouse's latest book proposes a universal ethical code ethical guidance many nurse theorists have previously thought impossible this is an informed clear and concise book that addresses the complex philosophical underpinnings of nursing practice for many students and practising nurses this easy to read and thought provoking text will prove invaluable in helping them understand the very nature of nursing and the work that nurses do leslie gelling bsc hons ma rgn research nurse department of neurosurgery university of cambridge uk the text is an admirable feat in the difficult task of combining theory and practice

david seedhouse has worked them into a seamless coherent whole which culminates in a practical code of ethics for nurses leila shotton rn phd lecturer in nursing ethics university of tasmania australia the reader is helped in a clear and direct way using philosophical analysis to understand the concepts that underpin practice kevin j power ma ba hons rscn rgn dipn cert ed senior lecturer school of nursing and midwifery de montford university leicester uk this book bold in scope represents a return to the pursuit of comprehensive nursing theory douglas olsen rn phd yale university usa nursing ideals and analytical philosophy rarely overlap as a result existing nursing codes fail to define key terms clearly enough to enable nurses to apply them david seedhouse tackles this problem by looking at nine key concept explains their meaning and shows how they can be applied in everyday situations the result is a precise yet compassionate framework which enables nurses to reflect deeply about the importance of their work and can support them as they strive to make ethically sound decisions provides a practical approach to traditionally intangible health care issues includes an array of accessible case studies and diagrams offers sensible strategies for nurses to implement philosophical insights in their daily care any nurse or other health care worker who has wondered how best to apply key words such as care dignity and ethics in everyday situations will find this practical and informed clarification indispensable

essay aus dem jahr 2016 im fachbereich pflegewissenschaft pflegemanagement sprache deutsch abstract gaining more experience and knowledge in philosophy nursing philosophy and the nursing paradigm has helped me to know more about myself as a human being and as a nurse in the process of reading i find it hard to commit to one point of view or one perspective however now i clearly see where i fit my philosophical perspective in general and in nursing specifically are heavily influenced by the empiricism and positivism perspective and ultimately aligns with the totality nursing paradigm from my ontological perspective in general i believe in objectivism that there is a single truth and there is a single reality i believe that we as human beings are always in interaction with the external reality which is the environment i believe that the environment is everything surrounding us and we as human beings interact with and influence the environment and the environment interacts with and influences us in turn in other words if someone follows a certain action he she will be able to predict what the outcomes will be to illustrate if i throw a ball up in the air i expect that it will hit the ground another example could be if i follow a specific diet and a specific exercise to lose weight then the result

will be what i expected which is weight loss unless there are some other contributing factors from my epistemological standpoint i believe that reality can be captured by senses and can be predicted by experience i believe that there is no knowledge without experience to illustrate if someone says an apple is red i can t imagine what the apple looks like if i have never seen a red one before how can one know what something tastes like if they have never tasted it experience is anything that came across our mind at any certain time in the past i also believe that knowledge can be gained through reasoning according to wisdom in my culture the reason is known the surprise is blown in other words knowledge needs clarifications and explanation so only reasoning can transform sensory data into something meaningful and understandable

consists of papers presented at a conference sponsored 1968 73 by the western council on higher education for nursing 1974 by the western society for research in nursing issues for 1993 2008 contain also addresses and abstracts of the win assembly
