contesting conformity investigates the writings of toqueville mill and nietzsche in order to examine the relationship between non conformity and modern democracy jennie ikuta argues that non conformity is an intractable issue for democracy while non conformity is often important for cultivating a just polity non conformity can also undermine democracy democracy therefore needs non conformity but not in an unconditional way this book examines this intractable relationship and offers resources for navigating the relationship in contemporary democracies in ways that promote justice and freedom

this books tells the neglected story of the relationship between custom and the european natural law and ius gentium tradition

it explores what cultural values and practices facilitated the emergence of custom and rendered it into as a source of the law of nations and how they did so

fragmentation has become a defining albeit controversial metaphor of international law scholarship in the era of globalisation some scholars see it as a new development others as history repeating itself some approach it as a technical issue and some as the reflection of deeper political struggles but there is near consensus about the fact that the established vision of international law as a unitary whole is under threat at the core of the fragmentation debate lies the concept of unity but this is hardly ever rationalised and is more assumed than explained its meaning remains vague and intuitive the concept of unity in public international law attempts to dispel that vagueness by exploring the various possible meanings of the concept of unity in international law however eschewing one grand theory of unity it identifies and compares five candidates intentionally pluralistic in its outlook the book does not engage in normative arguments about whether international law is or should be unitary but seeks to show instead that the concept of unity is contested and that discourses on fragmentation are necessarily contingent the thesis on which the book is based won the 2009 prize for best doctoral thesis from the association des professeurs de droit du québec

a unifying theme of loeb s work is epistemological that descartes and hume advance theories of knowledge that rely on a substantial naturalistic component adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief forming mechanisms thus loeb shows a surprising affinity between the epistemologies of the two figures surprising because they are often thought of as polar opposites in this respect descartes and hume are unique in that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy their ideas continue to be a vital part of the field at large this volume will thus appeal to advanced students and scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline

contains the first printing of sartor resartus as well as other works by thomas carlyle
