this updated second edition of oil gas production in nontechnical language is an excellent introduction for anyone from petroleum engineers and geologists new to their careers to financial marketing legal and other professionals and their staffs interested in the industry e p service company personnel will find it particularly beneficial in understanding the roles played by their clients not only does it cover production fundamentals but it backs up to give the necessary upstream background geology origins of oil and gas and ownership and land rights as well as surface operations and even production company strategy development

the old fashioned doctor whose departure from the modern medical scene is so greatly lamented was amply aware of each patient s per sonality family work and way of life today we often blame a doctor s absence of that awareness on moral or ethical deficiency either in medical education or in the character of people who become physicians an alternative explanation however is that doctors are just as moral ethical and concerned as ever before but that a vast amount of additional new information has won the competition for attention the data available to the old fashioned doctor were a patient s history phys ical examination and personal profile together with a limited number of generally ineffectual therapeutic agents a doctor today deals with an enormous array of additional new information which comes from x rays biopsies cytology electrographic tracings and the phantas magoria of contemporary laboratory tests and the doctor must also be aware of a list of therapeutic possibilities that are both far more effective and far more extensive than ever before

this volume provides a definitive view of the relationship between input interaction and second language acquisition in so doing it should prove useful to those whose major concern is with the acquisition of a second or foreign language as well as for those who are primarily interested in these issues from a pedagogical perspective the book does not explicate or advocate a particular teaching methodology but does attempt to lay out some of the underpinnings of what is involved in interaction what it is and what purpose it serves research in second language acquisition is concerned with the knowledge that second language

learners do and do not acquire and how that knowledge comes about this book ties these issues together from three perspectives input interaction framework information processing and learnability

a new edition of petrochemicals for the nontechnical person date unspecified useful as a text includes exercises and a reference but no bibliography for business and other nontechnical personnel in the petrochemical industry annotation copyright book news inc portland or

language acquisition research is challenging the intricate behavioral and cognitive foundations of speech are difficult to measure objectively the audible components of speech however are quantifiable and thus provide crucial data this practical guide synthesizes the authors decades of experience into a comprehensive set of tools that will allow students and early career researchers in the field to design and conduct rigorous studies that produce reliable and valid speech data and interpretations the authors thoroughly review specific techniques for obtaining qualitative and quantitative speech data including how to tailor the testing environments for optimal results they explore observational tasks for collecting natural speech and experimental tasks for eliciting specific types of speech language comprehension tasks are also reviewed so researchers can study participants interpretations of speech and conceptualizations of grammar most tasks are oriented towards children but special considerations for infants are also reviewed as well as multilingual children chapters also provide strategies for transcribing and coding raw speech data into reliable data sets that can be scientifically analyzed furthermore they investigate the intricacies of interpretation so that researchers can make empirically sound inferences from their data and avoid common pitfalls that can lead to unscientific conclusions

with the encroachment of the internet into nearly all aspects of work and life it seems as though information is everywhere however there is information and then there is correct appropriate and timely information while we might love being able to turn to wikipedia for encyclopedia like information or search google for the thousands of links
