excerpt from lecture notes on some of the business features of engineering practice in preparing the second edition of my lecture notes certain additions have been suggested by the experience of the classroom and by changes almost revolutionary which have taken place in the industrial field as explained in the introduction to the first edition the lectures and papers contained in reprints were collected originally for the purpose of cultivating in the students a sympathetic attitude of mind toward the more specific instruction to follow experience in the classroom has shown that these papers can also be usefully employed as suggestive material for experience talks therefore with the added addresses they have been included in this volume as part i in part ii i have brought together my own lecture notes which appeared originally in the first edition of these notes and its several supplements much of this material has been rearranged to bring it into better sequence and portions have been rewritten wholly or in part considerable new material has been added particularly on the all important subject of depreciation about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

empirical verification of knowledge is one of the foundations for developing any discipline as far as software construction is concerned the empirically verified knowledge is not only sparse but also not very widely disseminated among developers and researchers this book aims to spread the idea of the importance of empirical knowledge in software development from a highly

practical viewpoint it has two goals 1 define the body of empirically validated knowledge in software development so as to advise practitioners on what methods or techniques have been empirically analysed and what the results were 2 as empirical tests have traditionally been carried out by universities or research centres propose techniques applicable by industry to check on the software development technologies they use

excerpt from supplement no 1 to lecture notes on some of the business features of engineering practice these notes are intended to supplement the matter contained in lecture notes on some of the business features of engineering practice lately issued work in the class room has subsequently developed the fact that these additions are advisable and as the course already covers far more ground than is represented in the original notes and these additions other supplements will probably be issued from time to time again i have to thank mr white for his valuable assistance so willingly rendered about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
