master s thesis from the year 2004 in the subject business economics controlling grade a university at albania state university of new york
language english abstract in order to do justice to the increased requirements on project and business controlling there is a need for a
systematic approach tailored to the corporation involved many corporations have been shown to prioritize improvement measures
insufficiently if at all despite increased requirements on the economic viability of projects since resources are limited in all companies
improvement measures with the highest relative output should be given preference the usual methods used up to now have been either
inappropriate or are no longer sufficient the value analyzer is a method supported tool for estimating the expected improvement of key
performance indicators as a part of a general improvement in corporate performance this makes it easy to focus on worthwhile measures and
supports a general economic calculation to base a go no go decision on before the start of an implementation project based on general key
performance indicators specific scenarios can be created and then altered and or simulated by changing the parameters or factors of influence
this is all based on a three level principle in the calculation model definition of a primary goal kpi key performance indicator for example
inventory level breakdown into part goals kpi elements performance indicator element for example finished products inventory level
determination of appropriate measures for improving the part goal in the calculation of business scenarios that follows the exact impact of
enablers and the optimal combination of appropriate measures can be revealed or possible measures can be prioritized according to specific
aspects e g effort in implementation the more complex the situation the higher the value added from the value analyzer s structured solution
compilation of 958 sources intended primarily for librarians author title and subject indexes

lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the nasa scientific and technical information database
