specialist periodical reports provide systematic and detailed review coverage of progress in the major areas of chemical research written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry for over 80 years the royal society of chemistry and its predecessor the chemical society have been publishing reports charting developments in chemistry which originally took the form of annual reports however by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series specialist periodical reports was born the annual reports themselves still existed but were divided into two and subsequently three volumes covering inorganic organic and physical chemistry for more general coverage of the highlights in chemistry they remain a must since that time the spr series has altered according to the fluctuating degree of activity in

various fields of chemistry some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued

this concise text book gives the knowledge of basic understanding of herbal drug industry the quality of raw material guidelines for quality of herbal drugs herbal cosmetics natural sweeteners nutraceuticals etc this book also emphasizes on good manufacturing practices gmp patenting and regulatory issues of herbal drugs which are comprehensively presented in all the chapters which will assist to understand the material in a smarter way all efforts have been made to present the subject in student friendly and easy to understand this book is a genuine effort to clarify the basics of herbal drug technology in an effortless and interesting manner and as per the syllabus prescribed for the b pharm semester vi students by pharmacy council of india

from july 28 to august 3 1991 an international meeting on the regulation of chloroplast biogenesis was held at the capsis beach hotel in aghia pelaghia on the island of crete greece the meeting advanced research workshop lecture course was co sponsored by nato febs and iub and was held under the auspices of the international society for chloro plast development the greek ministry of industry research and technol ogy and the national center for scientific research demokritos the meeting focused on recent advances in the field of chloroplast biogenesis and the regulatory mechanisms underlined and brought together over 120 experts and students of the field from 22 countries the subject of chloroplast biogenesis has experienced great progress in recent years mainly thanks to the application of molecular biology techniques and methodology new findings that emerge gradually unravel the regulatory mechanisms involved in the assembly stabilization and growth of the photosynthetic units in thylakoids the signal transduction chain leading from photoreception to gene expression the transport of nuclear coded proteins into stroma soluble supramolecular enzyme complexes as well as thylakoid bound supramolecular

complexes involved in light energy transduction it was the aim of this meeting to bring together experts and students coming from diverse disciplines ranging from botany and plant physiology to molecular biology biophysics and biotechnology to discuss the recent advances in the field so that thorough exchange of ideas and working hypotheses would be achieved
