the study of language has changed substantially in the last decades in particular the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics like informal reports of native speakers judgments surveys corpus studies or fieldwork this move is an enriching feature of contemporary linguistics allowing for a better understanding of a phenomenon as complex as natural language where all sorts of factors internal and external to the individual interact chomsky 2005 this has generated some sort of divergence not only in research approaches but also in the phenomena studied with an increasing specialization between subfields and accounts at the same time it has also led to subfield isolation and methodological a priori with some researchers even claiming that theoretical linguistics has little to offer to cognitive science see for instance edelman christiansen 2003 we believe that this view of linguistics and cognitive science as a whole is misguided and that the complementarity of different approaches to such a multidimensional phenomenon as language should be highlighted for convergence and further development of its scientific study see also jackendoff 1988 2007 phillips lasnik 2003 den dikken bernstein tortora zanuttini 2007 sprouse schütze almeida 2013 phillips 2013

match the picture puzzle and activity book for preschool kids age 3 5 matching pictures is as simple as 1 2 3 with 100 pages of these cool and crazy match the picture puzzles match the picture is designed to give preschool kids practice with identifying common pictures and shadows through a simple fun game the puzzle features all images of common items animals and even stuffs that you see on the streets in the beginning a picture or a shadow of an object for example a car is displayed and kids are prompted to choose the images that corresponds with the shadow or the outline of the images in the

short word sections kids are prompted to choose the correct word that corresponds with the accompanying images once all of the pictures have been matched kids can cut out the pictures showing which pictures go with which shadow or word pictures are sorted randomly with each puzzle to provide a challenge if the game is played more than once

for speaking words in the lexicon are somehow activated from conceptual representations but we know surprisingly little about how this works precisely which of the attributes of the concept dog e g barks is walked with a leash carnivore animate have to be activated in a given situation to be able to select the word dog are there things we know about dogs that are always activated for naming and others that are only activated in certain contexts or even never to date investigations on lexical access in speaking have largely focused on the effects of distractor nouns on the naming latency of a target noun we have learned that distractors from the same semantic category e g cat hinder naming but associatively related distractors leash may facilitate or hinder naming however associatively related words can have all kinds of semantic relationships to a target word and with few exceptions the effects of specific semantic relationships other than membership in the same category as the target concept have not been systematically investigated this special issue aims at moving forward towards a more detailed account of how precisely conceptual information is used to access the lexicon in speaking and what corresponding format of conceptual representations needs to be assumed
