the historical interface between science and religion was depicted as an unbridgeable conflict in the last quarter of the nineteenth

century starting in the 1970s such a conception was too simplistic and not at all accurate when considering the totality of that relationship this volume evaluates the utility of the complexity principle in past present and future scholarship first put forward by historian john brooke over twenty five years ago the complexity principle rejects the idea of a single thesis of conflict or harmony or integration or separation between science and religion rethinking history science and religion brings together an interdisciplinary group of scholars at the forefront of their fields to consider whether new approaches to the study of science and culture such as recent developments in research on science and the history of publishing the global history of science the geographical examination of space and place and science and media have cast doubt on the complexity thesis or if it remains a serviceable historiographical model

the essays which follow as theological reflections of a christian the ontological reality of philosopher are essays of inquiry concerning and underlying truths revealed by god divine revelation of course cannot be encompassed within a few dogmatic formulae in any adequate manner it is the mysterious plenitude of the historical human encounter with the self revealing god who has revealed his salvific designs for men this revelation can be approached from many view points of scientific study such as those of religious psychology historical theology scriptural study the history of dogmas but also that of the philosophical thinker seeking to understand what he has already believed so far as this be possible in regard to the mysteries of god s inner life and of the new creation that he works in us by his grace in our rather non metaphysical age such an inquiry into the underlying ontological reality opened to us by the revelation of god is somewhat unfashionable but the issues remain and in fact one can only choose between a rather unconsciously and uncritically accepted attitude about the ontological significance of such dogmatic truths as the existence of the trinity and the hypostatic union and created grace and a consciously and critically developed analysis in the light of and with the help of such understanding of being as the philosophers can offer metaphysical theology of this kind is here to stay regardless
