gerson's book is a highly valuable well written contribution to platonism research it persuasively makes a case for understanding plato's philosophy as a coherent system that has an intricate and meaningful relation to later platonistic philosophical positions from this point plato appears as a platonist indeed claus lattman classical journal was plato a platonist while ancient disciples of plato would have answered this question in the affirmative modern scholars have generally denied that plato's own philosophy was in substantial agreement with that of the platonists of succeeding centuries in from plato to platonism lloyd p gerson argues that the ancients are correct in their assessment he arrives at this conclusion in an especially ingenious manner challenging fundamental assumptions about how plato's teachings have come to be understood through deft readings of the philosophical principles found in plato's dialogues and in the platonistic tradition beginning with aristotle he shows that platonism broadly conceived is the polar opposite of naturalism and that the history of philosophy from plato until the seventeenth century was the history of various efforts to find the most consistent and complete version of anti naturalism gerson contends that the philosophical position of plato plato's own platonism so to speak was produced out of a matrix he calls ur platonism according to gerson ur platonism is the conjunction of five antis that in total arrive at anti naturalism anti nominalism anti mechanism anti materialism anti relativism and anti skepticism plato's platonism is an attempt to construct the most consistent and defensible positive system uniting the five antis it is also the system that all later platonists throughout antiquity attributed to plato when countering attacks from critics including peripatetics stoics and sceptics in conclusion gerson shows that late antique philosophers such as proclus were right in regarding plotinus as the great exegete of the platonistic revelation
