the increased sophistication and availability of massively parallel supercomputers has had two major impacts on research in artificial intelligence both of which are addressed in this collection of exciting new ai theories and experiments massively parallel computers have been used to push forward research in traditional ai topics such as vision search and speech more important these machines allow ai to expand in exciting new ways by taking advantage of research in neuroscience

and developing new models and paradigms among them associate memory neural networks genetic algorithms artificial life society of mind models and subsumption architectures a number of chapters show that massively parallel computing enables ai researchers to handle significantly larger amounts of data in real time which changes the way that ai systems can be built which in turn makes memory based reasoning and neural network based vision systems become practical other chapters present the contrasting view that massively parallel computing provides a platform to model and build intelligent systems by simulating the massively parallel processes that occur in nature

for education training

exploring information systems research approaches is intended for supervisors and research students in the information systems and related fields this collection of thought provoking articles arranged in sections that reflect the broadening nature of the field provides examples of a range of research approaches this book focuses on different research approaches their strengths limitations and the conclusions which can be drawn from them and explores the impact of information and communication technologies on groups on organizations between organizations on markets and on society worldwide the articles selected have been chosen to represent an approach to research or an alternative design within an approach e g single case versus multiple cases survey within industry versus survey across industries each section is preceded by an editorial introduction that places the chosen articles in context of other similar research and provides a summary of the articles in terms of the research method employed focus and perspective of the research technology being employed findings and overall contribution of the work each introduction also highlights various issues and factors that the reader should consider when studying each of the articles in the section and includes ideas for further reading and discussion questions suitable for doctoral research seminars

since september 11 public discourse has often been framed in terms of absolutes an age of innocence gives way to a present under siege while the united states and its allies face off against the axis of evil this special issue of social text aims to move beyond these binaries toward thoughtful analysis the editors argue that the challenge for the left is to develop an antiterrorism stance that acknowledges the legacy of u s trade and foreign policy as well as the diversity of the muslim faith and the dangers presented by fundamentalism of all kinds examining the strengths and shortcomings of area race and gender studies in the search for understanding this issue considers cross cultural feminism as a means of combating terrorism racial profiling of muslims in the context of other racist logics and the homogenization of dissent the issue includes poetry photographic work and an article by judith butler on the discursive space surrounding the attacks of september 11 this impressive range of contributions questions the meaning and implications of the events of september 11 and their aftermath contributors muneer ahmad meena alexander lopamudra basu judith butler zillah eisenstein stefano harney randy martin rosalind c morris fred moten sandrine nicoletta yigal nizri jasbir k puar amit s rai ella shohat ban wang

the chapters in this volume investigate how visual and material features of early english books documents and other artefacts support or potentially contradict the linguistic features in communicating the message in addition to investigating how such communication varies between different media and genres our contributors propose novel methods for analysing these features including new digital applications they map the use of visual and material features such as layout design or choice of script typeface against linguistic features such as code switching lexical variation or textual labels to consider how these choices reflect the communicative purposes of the text for example guiding readers to navigate the text in a certain way
