this is a summary of bestselling author robert greene s the 48 laws of power by robert greene this summary is intended to give you an in depth overview of the key concepts and ideas of the book at summary books we read every chapter extract the meaning and leave you with a new perspective and time to spare we do the work so you can understand the book in minutes not hours this concise book summary will help you cut through the 452 page full version of the 48 laws of power and quickly understand the key concepts and ideas for a lot of people feeling powerless is an unbearable feeling that makes them feel helpless and miserable even the most passive people never want less power over their lives and environments people are always looking for more power however this is where things get hairy if we seem too power hungry it can be dangerous and we can be considered a threat to others for that reason we have to be subtle when seeking more power in our lives think about it in terms of aristocratic courts from centuries ago that you see portrayed on television and in movies in those times a court was established around whoever was in power at that time king emperor etc and the courtiers were there to serve this person but each courtier had to do this in a way that wouldn t alert other courtiers and make them think that they were volleying for more power through a higher position if suspicions arose because of this a courtier might take action against that courtier to prevent that from happening things were done in subtle and covert fashions in order to not draw attention all of this had to happen in a place that was supposed to be the most elegant and refined

too so not only did everyone have to keep up their refined attitudes but they also had to be cunning to do this most turned to seduction charm and properly thought out strategies instead of the usual treachery that most power struggles consist of nowadays things are a lot like those aristocratic courts you have to be devious to gain the power you're looking for and you have to do so while still appearing to be a fair and civilized person to some power games like this seem evil and wrong but the truth of the matter is that most people enter into these types of games on some level even those who denounce power games and claim to have the moral high ground are more than likely playing a game of their own while trying to appear innocent at times these people may even be the biggest players and most manipulative individuals that is because their constant shunning of power games can make those around them believe that they'd never do anything underhanded leaving them free to play their game undetected when the world seems to be full of scheming courtiers looking to get ahead there is really no way you can get through life without playing some kind of power game since this game is inescapable you can only benefit by learning how to play it properly to do this you have to look at the world a certain way and learn the laws of power and acquire some basic skills that will allow you to apply those laws easily throughout your life basic skills for playing the power game these aren't hard skills but you'll want to learn them before moving onto the laws of power when you master them you'll see how easy it really is to play the power game to get what you're looking for out of life master your emotions distance yourself from moments play with appearances learn patience pay attention be indirect this is a uniquely written summary not the original book

a simple to understand summary guide of the 48 laws of power this summary guide gives you a condensed version of the most important

information in the book as well as the fundamentals you'll need to fully comprehend and apply it. The 48 laws of power by Robert Greene is a self-help book that offers vital advice to anyone interested in attaining, keeping, or protecting against power. It is amoral, brutal, deceitful, and pragmatic. The sense of having no control over people or situations is usually distressing, and we are unhappy when we feel helpless, no matter who we are, what our ambitions are, or where we come from. We all crave power. It's risky though to appear overly power hungry or to seek power in an overt, visible way. You must remain subtle if you are to succeed in this game. On the exterior, appear fair and trustworthy, but on the inside, be crafty and pragmatic. Men in positions of authority grasp the art of social interactions and develop an image that garners respect and dispels distrust. They are capable of adapting to any situation; they are completely in charge of their emotions; they can manipulate and achieve a tactical advantage; they use deception, secrecy, and selective honesty; they set clear objectives and do everything in their power to achieve them. After reading this book, you'll be able to not only do the same when the situation calls for it, but you'll also be able to recognize and defend against others who employ such tactics. This summary summarizes the main points and highlights the most essential lessons from the original book. This summary will serve as a reminder of the main ideas and essential topics if you've already read the original. If you haven't already, don't worry; you'll find everything you need to know right here. Let's get started by scrolling up, selecting "buy now" with 1 click. A complete summary of the 48 laws of power. The desire for power is a fundamental human behavior. When one feels that he has no power over others or events, he is likely to be depressed. Everyone wants power. Those who pretend to have no desire for power are either deceiving themselves or attempting to deceive others. Power is like a drug that makes you stronger each time you taste it; the more you get, the more you want, even though it is a fundamental human behavior. The desire for power is considered impolite and selfish. It is widely held that those who seek power must seem to have no interest in it, and on the contrary, they must pretend to care only about others. The one who can disguise his pursuit of power with his care for others ends up becoming the most powerful. This seems paradoxical, but the fact remains that you cannot honestly and forthrightly pursue power; you invariably have to disguise both your means and your ends. The 48 laws of

power by robert greene is a collection of laws based on historical and philosophical anecdotes these laws are amoral as they themselves don't take into account any sense of right or wrong instead the laws focus on how one can increase their influence over any situation regardless of their moral consequences this book explores the nuances of manipulating people around you for establishing power grab a copy and learn more
