graham's work was published by T.S. Eliot in the 1940s and 50s but as a major post-war poet his work has received astonishingly little critical attention given its prestige and influence. This collection of essays covers all aspects of graham's work: its critical reception, recent influence and its relations with other developments in the arts, in particular the work of the St Ives School of Visual Artists. It includes some biographical material, brief reminiscences by and interviews with those who knew him, and discussions of the material contained in several collections of manuscripts. Nothing so far published has paid attention to these manuscript collections or to the large number of uncollected poems published since his death. Neither has enough been written about graham's importance to poets of the 1980s and 1990s. The ten essays in this book are all extremely competent studies of graham's work, constantly aware of the subtleties of graham's very individual attitudes to his art. The book will make an excellent companion for many readers and students.

it has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events it is not that the facts of history have changed no one will dispute that the battle of waterloo occurred on june 1815 or that the allied invasion of europe began on june 1944 what each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation by examining the facts of history from a new perspective today's historians hope to reveal some new truth that will not

only illuminate the course of history but also validate contemporary values and societal ideals although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today's organizational cultural and economic realities hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities
