this book provides a comprehensive study of the work of m david merrill a major pioneer in the field of instructional design this book centers on his research on his second generation instructional design id2 theory instructional transaction theory and first principles of instruction which has had a substantial impact on the instructional design field it s appealing to the instructional design research and practitioner based communities who can draw on specific sections of this book to enhance their own work it is also intended for those seeking to learn more about the relationship between the instructional design field learning theory curriculum studies and lifelong learning adult education studies through this critical yet empathetic study of merrill s 50 year research agenda this

book provides an illuminating field of entry into a broad range of topics both those that are central to merrill s own research agenda and into areas that extend well beyond his essentially cognitivist epistemological assumptions

the inclusive housing design guide is a revised and updated edition of the seminal habinteg housing design guide first published in 2002 the guide provides a brief and advice for all those involved in the design and delivery of habinteg developments informing new build technical standards and employers requirements for accessible homes this new guide takes into account updated reference standards specifically addressing m4 2 and m4 3 of uk building regulations the proposed guide will provide the rationale for specifications and technical guidance on how to deliver accessible and inclusive housing that is flexible and adaptable to changing needs with invaluable advice insights explanations and illustrations it is an essential guide on how to deliver housing that is functional inclusive and meets the changing needs of people of all ages

finish manufacturing processes are those final stage processing techniques which are deployed to bring a product to readiness for marketing and putting in service over recent decades a number of finish manufacturing processes have been newly developed by researchers and technologists many of these developments have been reported and illustrated in existing literature in a piecemeal manner or in relation only to specific applications for the first time comprehensive materials finishing three volume set integrates a wide body of this knowledge and understanding into a single comprehensive work containing a mixture of review articles case studies and research findings resulting from r d activities in industrial and academic domains this reference work focuses on how some finish manufacturing processes are advantageous for a broad range of technologies these include applicability energy and technological costs as well as practicability of implementation the work covers a wide range of materials such as ferrous non ferrous and polymeric materials there are three main distinct types of finishing processes surface treatment by which the properties of the material are modified without generally changing the physical dimensions of the surface finish machining processes by which a small layer of material is removed from the surface by various machining processes to render improved surface characteristics and surface coating processes by which the surface properties are improved by adding fine layer s of materials with superior surface characteristics each of these primary finishing processes is presented in its own volume for ease of use making comprehensive materials finishing an essential reference source for researchers and professionals at all career stages in academia and industry provides an interdisciplinary focus allowing readers to become familiar with the broad range of uses for materials finishing brings together all known research in materials finishing in a single reference for the first time includes case studies that illustrate theory and show how it is applied in practice

the routledge companion to twentieth and early twenty first century urban design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years the ideas and projects hypothetical and built range in scale from the city to the urban block level the focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them the morphology of a city its built environment evolves unselfconsciously as private and governmental investors self

consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs this book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces including architects planners urban historians urban geographers and urban morphologists

designers especially design students rarely have access to children or their worlds when creating products images experiences and environments for them therefore fine distinctions between age transitions and the day to day experiences of children are often overlooked designing for kids brings together all a designer needs to know about developmental stages play patterns age transitions playtesting safety standards materials and the daily lives of kids providing a primer on the differences in designing for kids versus designing for adults research and interviews with designers social scientists and industry experts are included highlighting theories and terms used in the fields of design developmental psychology sociology cultural anthropology and education this textbook includes more than 150 color images helpful discussion questions and clearly formatted chapters making it relevant to a wide range of readers it is a useful tool for students in industrial design interaction design environmental design and graphic design with children as the main audience for their creations
