this book informs an international audience of teachers scholars and policymakers about the development of learning progressions for

primary and secondary geography education in various countries and regions of the world the book represents an important contribution to learning progressions research and practice the different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography the book compares educational systems and how teachers and curriculum developers use the concept of learning progression to guide educational practices as an approach to educational research learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards the book analyzes the general conditions of learning progressions within the context of a globalized world important themes are addressed such as knowledge acquisition in formal education measuring learning progressions in informal settings learning progressions for one curriculum standard or several standards conditions to assess progression in the learning of facts concepts and skills and multiple pathways for understanding or learning geography the contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries the book appeals to k 12 teachers school administrators policymakers researchers in geography education professors and lecturers at universities around the world

in recent years there has been increased attention paid to the importance of assessment in geographical education the chosen subject for this book assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers to be effective assessment needs to be valid reliable and fair validity is about ensuring that we assess what we claim we are assessing reliability is about measuring performance and understanding in a consistent way without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do as geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master we need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning while there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare this is a concern given the distinctive nature of geography and the important role of assessment in the learning process this scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography the chapters are written by leading researchers in geographical education from across the globe these chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across australia usa south korea germany switzerland and singapore what unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
