navigating through geometry in grades 3 5

this introduction to calculus was written for liberal students particularly for those principal interest is in the humanities

giordano bruno and the geometry of language brings to the fore a sixteenth century philosopher s role in early modern europe as a bridge between science and literature or more specifically between the spatial paradigm of geometry and that of language through analysis of bruno s writings saiber exposes the verbal geometry of his language and shows how his writing necessitates a crafting of space and is in essence a lexicon of spatial concepts this study constitutes an original contribution both to scholarship on bruno and to the broader fields of early modern scientific and literary studies
