the eu is one of the most notoriously complex international organisations it is the only supranational organisation where nation states agree to share sovereignty in some areas but not in others at the heart of the eu debate across europe are two opposing groups one aims to devolve more sovereignty to the eu with the aim of creating a european super state and the other wishes to devolve less effectively relegating the eu to a mere discussion forum in this accessible and engaging book mark corner provides an essential introduction to the history and modern workings of the eu focusing on key themes in the union s development and the debates surrounding future enlargement this book answers the key questions related to the eu and provides a one stop shop for anyone curious about future of europe

the european union is frequently accused of having a democratic deficit many commentators argue that this could be remedied by increasing the powers of the european parliament relative to those of the council and the commission the fact that the european parliament is the only eu institution whose members are directly elected leads to the assumption that it is also the most legitimate the author argues that this position is based on the flawed assumption that the nature of the european citizenry is similar to those of the member states in other words the position assumes that the union has a demos or a people who are prepared to accept majority outcomes even when finding themselves in the minority in this book the author argues that this is not the case and that the most severe dimension of the democracy problem is not procedural but socio psychological the fact that the eu does not have a people means that establishing an eu wide democracy based on analogies to domestic political systems is likely to lead to a further loss of democratic legitimacy the eu can rely on output legitimacy in policy areas which do not require pan european solidarity and identity and in which policy making at eu level increases efficiency and thereby benefits all citizens however policy areas which require high levels of solidarity or a common identity should either remain fully within the nation states or be subject to intergovernmental rather than supranational decision making at eu level

this is an account of the main developments in the process of european integration it provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation
