most of the contemporary debates about the european union about its role its institutional arrangements its development dynamic its expansion and possible futures revolve around the issue of political legitimacy legitimacy and the european union addresses the fundamental issues at the heart of the debates on europe and examines such key questions as what is the scope of the eu s authority is there a legitimacy deficit if so how much does it matter does political legitimacy only reside in the nation state using a multi dimensional conception of political legitimacy the text analyses the character and problems of the european union s authority in respect of democracy political identity and governmental performance its distinctive claim is that political legitimacy can now only be understood as a process of interaction between the state and eu levels and that this interaction impacts differentially on different member states

since the maastricht ratification debate of the early 1990s the legitimacy of the european union has become a subject of controversy with unprecedented force europeans have begun to question the need for deeper integration some fear threats to established national identities while others perceive the emergence of a distant but powerful brussels beyond the reach of democratic control legitimacy and the european union breaks with established approaches to the problem of the legitimacy of the european union by focusing on the recent trend towards reconceptualization of the eu not as a superstate or an organization of states but as a multi level contested polity without precedent the book examines the implications of this reconceptualization for the problem of legitimacy individual chapters focus on policy areas institutions and identity politics taken together they reach two main conclusions while europeans do not strongly identify with the eu they increasingly recognize it as a framework for politics alongside existing national and subnational structures and while the eu lacks central democratic institutions the integration process has spawned significant informal and pluralist forms of representation rethinking recognition and representation ouside the context of the nation state points to important if little understood actual and potential sources of eu legitimacy

this volume collects allen buchanan s previously published articles with a focus on ethics and international law specifically with regard to human rights the legitimacy of international

institutions and the ethics of force across borders the work fits together tightly in its systematic interconnections and collectively it makes the case for a holistic and systematic approach to issues that are at the forefront of current discussions in political and legal philosophy issues that have traditionally been seen as separate

delegitimation has become the new battleground for israel and the critics of israeli military operations but the israeli experience reveals a more general engagement where all states act strategically to build legitimacy for their policies and all resist attempts at delegitimation to understand these processes it is necessary to see how politicized moral and legal judgments shape both the use of force by states and our judgments about the means and the outcomes this is a book about legitimacy military lawyers and security more particularly it is about how the legitimacy of israel's asymmetric military operations cannot be detached from the politics of law and ethics sometimes it is enough that states respect the laws of armed conflict but at other times they may be held to a higher standard this does not happen in a vacuum rather it is the product of political engagement in the murky politics of international legitimacy where standards are negotiable and some states get a harder time than others there is a strong theoretical analysis underpinning a discussion that constantly returns to the practical problems of modern armed conflict where combatants hide among civilians and states complain about the unrealistic expectations of human rights ngos here the law is unclear and there are choices to be made the book presents new research into the involvement of israeli military lawyers in operational targeting decision making that has life and death consequences the case studies concern targeted killing during the second intifada israel's 2006 lebanon war the 2009 operation cast lead in gaza and finally the 2010 israeli maritime interception of the turkish flotilla to gaza the investigation identifies a struggle between the proponents of human rights in war and those who promote the rights of states to deploy military force for the security of their citizens but not all parties to a military conflict are held to the same standards in fact the analysis maps a complex political deployment of law and ethics in the strategic calculation of legitimacy costs and the diplomatic processes whereby they are contested with policy implications for those in charge of the design and execution of military operations

drawing together leading international experts such as knut halvorsen robert y shapiro stefan svallfors and wim van oorschot this volume addresses issues of justice and legitimacy in the context of welfare state transformation providing a comparative

in this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity deliberative democracy and the plural polity provides a realistic but critical reform agenda that can animate struggles for justice in an enormously diverse world
