the debate about the relationship between international and community law usually centres on the question of which of these two belongs to the other and how special community legal order is in relation to international law in this volume a distinguished group of finnish and british academics and practitioners break new ground by instead of becoming mired in these questions clearly examining the international law aspects of the activities of the community and the union in doing so they have elucidated points of connection and possible points of conflict the result is a thought provoking collection of essays which examines community law through the conceptual

grid of international law and thus enriches our understanding of the workings of both

the european union celebrated its 60th anniversary in 2017 but celebrations were muted by brexit and the growing sense of a crisis of identity however as this seminal work shows the history and ambition of the european union are considerable written by key stakeholders who between them acted as architects adjudicators and arbitrators of the project it presents the definitive history of the first two generations of the european union this book revisits the birth and consolidation of the great project of a united europe and the political institutional judicial and economical frameworks of the european union from the process towards integration to the advancements and the impasses in building a political union
