this book examines the political and economic dimensions of food security in bangladesh and assesses the role of the state in meeting the challenges of food security the key concern which is at the heart of this study is to explore how bangladesh responds when its people go hungry there are no detailed empirical studies that examine the bangladesh s role by providing an historical cum political analysis however conventional approaches are primarily concerned with a partial diagnosis of the economic or nutritional problems of food security the book then provides a detailed picture of the missing dimensions of state that include the strength of institutions the scope of state functions and other important attributes in doing so it uses the concept of neo patrimonialism to explore the political system of bangladesh this book explicates the various impediments to food security ranging from the process of policy formulation to their implementation mechanisms it unpacks the structural weaknesses of the bangladesh s institutional capacity in promoting food security and in the process argues that the root cause of food insecurity is deeply embedded in the nature of the government itself and the political institutions that link the state and society

the united states department of agriculture s usda s economic research service s ers food availability data system includes three distinct but related data series on food and nutrient availability for consumption the data serve as popular proxies for actual consumption at the national level for over 200 commodities e g fresh spinach beef and eggs the core food availability fa data series provides data on the amount of food available per capita for human consumption in the united states with data back to 1909 for many commodities the loss adjusted food availability lafa data series is derived from the fa data series by adjusting for food spoilage plate waste and other losses to more closely approximate 4 actual intake the lafa data provide daily estimates of the per capita availability amounts adjusted for loss e g in pounds ounces grams and gallons as appropriate calories and food pattern equivalents i e servings of the five major food groups fruit vegetables grains meat and dairy

available for consumption plus the amounts of added sugars and sweeteners and added fats and oils available for consumption this fiscal year as part of its initiative to systematically review all of its major data series ers decided to review the fads data system one of the goals of this review is to advance the knowledge and understanding of the measurement and technical aspects of the data supporting fads so the data can be maintained and improved data and research to improve the u s food availability system and estimates of food loss is the summary of a workshop convened by the committee on national statistics of the national research council and the food and nutrition board of the institute of medicine to advance knowledge and understanding of the measurement and technical aspects of the data supporting the lafa data series so that these data series and subsequent food availability and food loss estimates can be maintained and improved the workshop considered such issues as the effects of termination of selected census bureau and usda data series on estimates for affected food groups and commodities the potential for using other data sources such as scanner data to improve estimates of food availability and possible ways to improve the data on food loss at the farm and retail levels and at restaurants this report considers knowledge gaps data sources that may be available or could be generated to fill gaps what can be learned from other countries and international organizations ways to ensure consistency of treatment of commodities across series and the most promising opportunities for new data for the various food availability series

an introduction to the urgent global question of how to feed the hungry global food production has never been more abundant yet nearly a billion people worldwide suffer from malnutrition virtually all of them in the developing world food security in these countries is a global humanitarian issue which becomes more urgent with every passing year there is a vital need to understand the nature and causes of food scarcity in developing countries in order to see to it that our global bounty reaches the hungry people who need it food security in the developing world offers a comprehensive single volume introduction to the subject it focuses on three core issues food availability food accessibility and food utilization in order to produce a rounded picture of the causes and possible solutions for food scarcity thorough and accessible it promises to help researchers and policymakers address this growing humanitarian crisis in a reasoned and targeted way food security in the developing world readers will also find future oriented approach which continuously highlights paths forward detailed discussion of topics including climate change and agricultural productivity price volatility diet and nutrition and many more examples and case studies drawn from across the developing world including sudan uganda nepal and afghanistan food security in the developing world is ideal for food scientists and technologists students in programs related to food science development studies geography and related subjects and policymakers working in food production and distribution
