the skills necessary to plan and deliver efficient health education programs are fundamentally the same whether it s in a classroom workplace hospital or community health

education creating strategies for school community health third edition provides the tools to make appropriate programming decisions based on the needs of the clients and the educational settings it encourages the systematic development of sound effective and appropriate presentation methods and demonstrates the evolving state of health education the philosophy presented in this text is based on the premise that the core of health education is the process of health education it is a must have resource for health education methods courses

the 4th edition of maternal and child health will continue to offer a comprehensive trusted introduction to the field of maternal and child health however this new edition with a new author team and new mch expert contributors will present the traditional mch topics in a modern context that addresses race ethnicity an expanded family focus including fathers and a broadened approach that will appeal not only to public health professionals but also to health professionals outside public health practice

the main objective in writing a thesis or dissertation is to teach students how to conduct research in a planned and systematic way health promotion education research methods second edition provides an overview of the different approaches to research methods and introduces students to the five chapter thesis or dissertation format important notice the digital edition of this book is missing some of the images or content found in the physical edition

for those developing or enhancing their knowledge and skills in education and mentorship in healthcare this book is a guide to the key theories issues and practical considerations involved in healthcare education in the 21st century it is aimed at those studying to be educators in both academic and practice settings as well as supporting the continuing professional development of more experienced lecturers and practice educators the book can be used as a reference source a platform for further study and an essential text the book comprises 40 succinct chapters each covering a topic and featuring a definition of the concept key points discussion of the main issues a case study to illustrate the application to practice and suggestions for further reading

updated and revised to keep pace with changes in the field the fourth edition of community health education methods a practical guide teaches students to effectively communicate health education messages and positively influence the norms and behaviors of both individuals and communities this text explores the methods used by health educators including didactic techniques designed to guide others toward the pursuit of a healthy lifestyle

a growing body of research identifies strong links between children s health social and educational outcomes it also notes the reciprocal benefits of access to quality education on individual and family health status in response to these findings the world health organization developed the concept of the health promoting school hps a living catalyst for healthy lives and for positive changes that students can take home and into the community case studies in global school health promotion provides readers with a theoretical and research base needed to understand the methods used in communities all over the world to

put this captivating concept in place case examples from over two dozen countries representing urban and rural areas in developing and developed nations outline the strategies taken to implement hps programs in individual schools municipalities and nations for each program case study authors explain the problems they tackled their motivation and supports to respond creatively and the barriers they faced in the cases authors describe the capacities and infrastructure they created and mechanisms for cooperation as well as the personnel financial and time requirements involved case studies were drawn from the following regions africa the americas europe eastern mediterranean south and southeast asia western pacific case studies in global school health promotion offers a world of insights ideas and guidance to those addressing social determinants of health at this formative stage including education and health policy makers professionals and administrators and researchers in national governments universities local schools community non governmental organizations and civil society the material provides interesting and useful information to those dedicated to these issues within who fresh partners and other united nations agencies it is also an instructive text for graduate students in public health education allied health professions and social sciences

researching medical education is an authoritative guide to excellence in educational research in the health professions presented by the association for the study of medical education and the association for medical education in europe researching medical education includes contributions from a team of international clinicians and non clinical researchers in health education representing a range of disciplines and backgrounds this accessible reference provides readers with the basic building blocks of research introduces a range of theories and how to use them illustrates a diversity of methods and their use and gives guidance on practical researcher development by linking theory and design and methods across the health profession education research spectrum this book supports the improvement of quality capacity building and knowledge generation researching medical education is the ideal resource for anyone researching health education from undergraduate through postgraduate training to continuing professional development

revision of principles and foundations of health promotion and education 2018 seventh edition

created in partnership with the association for the study of medical education asme this completely revised and updated new edition of understanding medical education synthesizes the latest knowledge evidence and best practice across the continuum of medical education written and edited by an international team this latest edition continues to cover a wide range of subject matter within five broad areas foundations teaching and learning assessment and selection research and evaluation and faculty and learners as well as featuring a wealth of new material including new chapters on the science of learning knowledge synthesis and learner support and well being the third edition of understanding medical education provides a comprehensive and authoritative resource summarizing the theoretical and academic bases to modern medical education practice meets the needs of all newcomers to medical education whether undergraduate or postgraduate including those studying at certificate diploma or masters level offers a global perspective on medical

education from leading experts from across the world providing practical guidance and exploring medical education in all its diversity understanding medical education continues to be an essential resource for both established educators and all those new to the field

this innovative text provides your teacher education and health education students with coverage of twelve modules about teaching and learning with an emphasis on health education readings and their applications for universities and schools each module begins with a guiding question that frames each reading and a graphic organizer that shows the critical concepts under study the text is organized into modules so that teacher candidates can create a mental model of how education and health can be studied through the big ideas of health education major concepts include wellness prevention health behaviors longevity health literacy health standards curriculum models learning styles the text also outlines how to develop and assess personal and social skills through weekly wellness workshops which are organized through the integrative pedagogy of cooperative learning peer education problem based learning and independent practice

the authors have joined forces again to reflect upon the ever changing world of health promotion as a result their highly respected textbook has been substantially rewritten to document both theoretical and practical developments within this important sphere of professional activity

medical education theory and practice is a new text linking the theory and the practice for graduate students and educators who want to go beyond the basics the scholarship of medical education is above all a practice but one that has a strong theoretical foundation neither theory nor practice stand still and both are grounded in research the novelty of this book lies in its interweaving of practice theory innovation and research the book starts with a theorised contemporary overview of the field next it explores the theoretical foundations of medical education in depth the remainder of the book reviews a whole a range of educational contexts processes and outcomes this work has been edited by a distinguished international team of medical educationalists and written by equally accomplished authors from across the globe representing a spectrum of disciplines this will be an invaluable text for all masters students in health professions education as well as phd students and education researchers wanting a background to the discipline educators and medical students will also find it a very useful resource written by key figures in medical educational research combined with a strong editorial influence from the international editorial team the text has a strong evidence based approach that is fully cognisant of research methodology issues the book provides a scholarly explanation on the topic rather than aiming to say the last word written throughout in a clear and comprehensible style the content is extensively referenced with additional suggestions for further reading

updated to keep pace with this ever evolving field the fifth edition of community and public health education methods a practical guide teaches students to effectively communicate health education messages and positively influence the norms and behaviors of both individuals and communities written by and for health education specialists this text explores the methods used by health educators including didactic techniques designed to guide others toward the pursuit of a healthy lifestyle divided into four sections this well organized

guide begins with a focus on building the foundation for selecting and applying community and public health education methods it then explores acquiring tools necessary for applying community and public health education and health promotion strategies section iii examines health communication and media including exploring social marketing concepts applying health communication skills using social media and exploring digital media strategies
