this book covers theoretical social and practical issues related to educational games
and simulations contributing to a more effective design and implementation of these

activities in learning environments provided by publisher

Yorick Wilks is a central figure in the fields of natural language processing and artificial intelligence. His influence extends to many areas and includes contributions to machine translation, word sense disambiguation, dialogue modeling, and information extraction. This book celebrates the work of Yorick Wilks in the form of a selection of his papers, which are intended to reflect the range and depth of his work. The volume accompanies a festschrift which celebrates his contribution to the fields of computational linguistics and artificial intelligence. The papers include early work carried out at Cambridge University, descriptions of groundbreaking work on machine translation and preference semantics, as well as more recent works on belief modeling and computational semantics. The selected papers reflect Yorick's contribution to both practical and theoretical aspects of automatic language processing.
