as the journalist walter lippmann noted nearly a century ago democracy falters if there is no steady supply of trustworthy and relevant news today s journalists are not providing it too often reporters give equal weight to facts and biased opinion stir up small controversies and substitute infotainment for real news even when they get the facts rights they often misjudge the context in which they belong information is the lifeblood of a healthy democracy public opinion and debate suffer when citizens are misinformed about current affairs as is increasingly the case though the failures of today s communication system cannot be blamed solely on the news media they are part of the problem and the best hope for something better patterson proposes knowledge based journalism as a corrective unless journalists are more deeply informed about the subjects they cover they will continue to misinterpret them and to be vulnerable to manipulation by their sources in this book derived from a multi year initiative of the carnegie corporation and the knight foundation patterson calls for nothing less than a major overhaul of journalism practice and education the book speaks not only to journalists but to all who are concerned about the integrity of the information on which america s democracy depends
