this well accepted book now in its third edition is an extension of the previous edition the text has further enriched with more information to understand animal behaviour coherently and scientifically the book attempts to provide a reasonably suitable account of animal behaviour for undergraduate as well as postgraduate students although behaviour of animals has fascinated people for a long behavioural biology has been incorporated in the syllabi very recently the study of behaviour received its important boost from the work of charles darwin who used the term instinct to refer to the natural behaviour of animals in the 1930s a comprehensive theory of animal behaviour emerged through the work of konrad lorenz and later

of niko tinbergen biological study of behaviour in fact came of age as a science when lorenz tinbergen and karl von frisch received the nobel prize for their contribution to science observing and describing exactly what animals do is fascinating and scientific analysis of their behaviour is significant for several reasons each species tends to have an array of stereotyped behaviours some of which are shared with related species but others are unique ecology natural selection macroevolution microevolution and gene constitute the foundation of animal behaviour various animal groups exhibit diverse strategies for their survival and reproduction which are discussed in this book the book is primarily intended for the students of b sc m sc zoology life science for their courses it would be useful for the researchers in the field of animal behaviour and conservation biologists it would also attract students who are pursuing courses in sociology and anthropology key features presents a well balanced view of ethology discusses the current development in the field includes a glossary of important terms offers chapter end questions to check the students understanding of the concept

the highly acclaimed manual for changing everyday habits now in an all new third edition we are consuming resources and polluting our environment at a rate that is outstripping our planet's ability to support us to create a sustainable future we must not only change our own actions we must educate and encourage those around us to change theirs if one individual recycles his plastic containers the impact is minimal but if an entire community recycles enormous amounts of resources are saved how then do we go about transforming people's good intentions into action fostering sustainable behavior explains how the field of community based social marketing has emerged as an effective tool for encouraging positive social change this completely revised and updated third edition contains a wealth of new research behavior change tools and case studies learn how to target unsustainable behaviors and identify the barriers to change understand various commitment strategies communicate effective messages enhance motivation and invite participation the strategies introduced in this ground breaking manual are an invaluable resource for anyone interested in promoting sustainable behavior including environmental conservation recycling and waste reduction water and energy efficiency and alternative transportation
