in a society more concerned with how to cope with existential dread than how to make actionable changes to save the planet a surprisingly large number of americans identify as environmentalists what can individual people do to lessen human impacts on the planet this is not an easy question most research is focused on large scale changes that go beyond anything an individual can accomplish and people are left feeling defeated rather than inspired to make changes in their everyday lives change starts at home and f stuart chapin iii has assembled a book for people who want to learn more about global changes and more importantly what they can do about them starting today grassroots stewardship approaches our current situation with an educated sense of hope and positivity this book emphasizes actions by individuals rather than governmental or corporate institutions to trigger transformational change readers will learn what they can do to most significantly transform their communities and the planet with more sustainable pathways

this edited work provides policy institutional and governance recommendations in response to the mea finding that humans have degraded ecosystems services at a faster rate and on a larger scale than at any time in human history this book focuses on ecosystems services as the benefits people receive from nature
