this volume starts the updating of the information on organonickel chemistry one of the most active areas of modern organometallic chemistry it covers all mononuclear compounds containing one nickel to carbon bond the main part is devoted to the family of planar π -allyl compounds and π -arenes which within 20 years has increased from about 250 to more than 1000 members this research interest has been stimulated by the fact that many compounds insert various unsaturated species into the Ni-C bond to create new organonickel species moreover these compounds are important as intermediates in many catalytic processes involving organic halides compounds containing H_2 bonded heteroalkene molecules including the C_1 fragments CO_2 and CS_2 and related metallocyclic compounds are also emphasized in this volume these types of compounds play an important role in a number of nickel catalyzed CO oligomerization reactions involving unsaturated organic compounds most of the compounds are well characterized by modern spectroscopic techniques the various types of compounds are in most cases confirmed by x ray diffraction the author of these volumes a member of the Mülheim group has made many contributions of his own and is eminently qualified to critically review this area of research

Britain and Russia maintained a frosty civility for a few years after Napoleon's defeat in 1815 but by the 1820s their relations degenerated into constant acrimonious rivalry over Persia the Ottoman Empire Central Asia the Great Game and towards the end of the century East Asia the first cold war presents for the first time the Russian perspective on this game drawing on the archives of the Tsars' Imperial Ministry both world powers became convinced of the expansionist aims of the other and considered these to be at their own expense when one was successful the other upped the ante and so it went on London and St Petersburg were at war only once during the Crimean War but Russophobia and Anglophobia became ingrained on each side as these two great empires hovered on the brink of hostilities for nearly 100 years not until Britain and Russia recognised that they had more to fear from Wilhelmine Germany did they largely set aside their rivalries in the Anglo-Russian Convention of 1907 which also had major repercussions for the balance of power in Europe before that came a century of competition diplomacy and tension lucidly charted in this comprehensive new history
