traces conflicts in Mexico over regional authority and labor employer relations between the state and competing industrialist and labor groups in Guadalajara Mexico City Monterrey and Puebla from the 1920s to the 1950s provided by publisher

Today Mexico is viewed as a success story in the management of economic adjustment and structural reform. Inflation is under control, capital and foreign investment are returning, and output growth has increased. Mexico's recovery, however, has been neither smooth nor rapid. In mid-1982, Mexico was in deep economic crisis, compounded by an unfavorable international environment. Mexico was saddled with a large foreign debt, world interest rates were high, commercial banks had stopped lending, and the price for oil was dropping. Conditions at home were no better, with rampant inflation, increasing capital flight, and chaos in financial and foreign exchange markets. To confront internal imbalances and accommodate adverse external conditions, Mexico adjusted its consumption and output, then sought new ways to foster growth. The crisis and adjustment imposed great hardship and demanded enormous discipline on the part of the government. This was accomplished without serious political or social disruption. In this book, Nora Lustig analyzes Mexico's economic evolution from the outset of the debt crisis in 1982 until the sweeping reforms began to bear fruit in the early 1990s. She explains the causes of the 1982 economic crisis and why it took Mexico so long to restore stability and growth. She also explores the question of the social costs of economic crisis and adjustment and why the process may have been easier for Mexico than other debt-ridden countries. A discussion of the emerging role of the state in Mexico and the country's new outward-oriented development strategy is followed by an analysis of its search for greater economic integration with the United States and Canada. Selected by Choice as an outstanding book of 1992.

In this book, the dynamics of continuity and change in the regional economic development of Mexico and the US border states are analyzed. These studies cover the last 25 years after the first trade agreement between a developed and a developing country took place and where international trade and investment have been combined with a set of relevant local factors such as regional innovation, industrialization patterns, multinational corporations, modes of operation, public

investment and national content of exports the book offers researchers a precise identification of stylized facts that characterize the pattern of regional development in Mexico and the US Southwest as well as state of the art applications contrasting hypotheses from new economic geography endogenous and neo Schumpeterian economic growth models and new international trade to graduate and advanced undergraduate students in the fields of spatial geographic economics this book offers an excellent source for its updated review of current topics on regional development in Mexico to policy makers the book helps to identify policy areas to reinforce the dynamics of regional development whereas other books have looked at the several impacts of NAFTA on national economies productive sectors and societies this book analyzes the trade agreement's impact with a long term view across the diversity of developments of Mexico's regions as well the analysis is carried out with the perspective of prospective reforms of a renovated trade agreement between the United States and the new Mexican federal administration the collaborators in this book are researchers who are experts at the international and national levels in the field of regional economic development during the last 25 years they have conducted their analyses in different regions of Mexico and the United States as university researchers advisors to state and federal governments and as practitioners
