this book examines why japan has one of the highest enrolment rates in cram schools and private tutoring worldwide it sheds light on the causes of this high dependence on shadow education and its implications for social inequalities the book provides a deep and extensive understanding of the role of this kind of education in japan it shows new ways to theoretically and empirically address this issue and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses contrary to earlier studies the book shows that shadow education does not inevitably result in increasing or persisting inequalities but also inherits the potential to let students overcome their status specific disadvantages and contributes to more opportunities in education against the background of the continuous expansion and the convergence of shadow education systems across the globe the findings of this book call for similar works in other national contexts particularly western societies without traditional large scale shadow education markets the book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution in which the shadow education industry has made itself seemingly indispensable

how do the benefits of higher education compare with its costs and how does this comparison vary across individuals and institutions these questions are fundamental to quantifying the productivity of the education sector the studies in productivity in higher education use rich and novel administrative data modern econometric methods and careful institutional analysis to explore productivity issues the authors examine the returns to undergraduate education differences in costs by major the productivity of for profit schools the productivity of various types of faculty and of outcomes the effects of online education on the higher education market and the ways in which the productivity of different institutions responds to market forces the analyses recognize five key challenges to assessing productivity in higher education the potential for multiple student outcomes in terms of skills earnings invention and employment the fact that colleges and universities are multiproduct firms that conduct varied activities across many domains the fact that students select which school to attend based in part on their aptitude the difficulty of attributing outcomes to individual institutions when students attend more than one and the possibility that some of the benefits of higher education may arise from the system as a whole rather than from a single institution the findings and the approaches illustrated can facilitate decision making processes in higher education
