psychiatric and mental health nursing theory and practice was conceived as a result of three major premises which in the view of the editors relate to the practice of psychiatric and mental health nursing first that high quality psychiatric and mental health nursing can be practised only if it is underpinned by appropriate nursing theory secondly that there exists a body of theory which can and should be applied to psychiatric and mental health nursing thirdly that there is a need for a text which will assist teachers students and clinicians to apply available nursing and borrowed theory to clinical practice the general aim of this book is to introduce nursing students to a theory based approach to caring for people with psychiatric and mental health problems the phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis and also to those who have mental health problems but who do not necessarily have such a diagnosis the client group to which the material in this text applies will include those who are or have been hospitalized and those in the community who have not been and may never be hospitalized the intended readership is all students of psychiatric and mental health nursing issues for example basic and post basic nurses and their teachers

introducing mental health nursing offers a systematic overview of both the science and the art of caring for people experiencing mental health problems it addresses the attitudes knowledge and skills required to provide care for consumers across all health care settings from specialist mental health services to general hospitals and community care the authors place the consumer at the centre of all aspects of mental health care and emphasise the importance of the therapeutic relationship as the cornerstone of mental health nursing practice they also encourage nurses to think critically about the perspectives that they bring to their practice they outline key skills in assessment working collaboratively with clients and creating a safe therapeutic environment they also cover essential clinical knowledge needed to work effectively with people with mental illness emphasis is placed on the role of the nurse as an intrinsic member of the mental health team this book is an excellent addition to the literature in this important but long neglected area its value is substantially enhanced by actively incorporating an informed consumer perspective essential for all practitioners professor brian burdekin ao i recommend this text to all students of nursing whether you intend to pursue a career in this speciality or if you simply desire to provide the best care possible in any field of practice associate professor stephen elsom rn phd director centre for psychiatric nursing the
