according to the christian faith jesus christ is the ultimate revelation not only of the nature of god the creator but also of how god the creator relates to the created order the new testament explicitly relates the act of creation to the person of jesus christ who is also a participant within creation and who is said by his acts of participation to have secured creation s ultimate redemption from the problems which presently afflict it christian theology proposes that jesus christ the incarnate word and wisdom of god the agent in whom the spirit of god is supremely present among us is the rationale and the telos of all things time space as we experience and explore it nature and all its enigmas matter itself christology is thus utterly fundamental to a theology of creation as this is unfolded both in scripture and in early christian theology for all this the contemporary conversation about science and faith tends to a remarkable degree to neglect the significance of jesus christ focusing instead on a generic god of wonder or god of natural theology such general theism is problematic from the perspective of christian theology on many levels and has at times led to a more or less deistic theology the impression that god has created the world then largely left it to itself such a theology is far removed from classical christian renderings of creation providence redemption and eschatology according to these the theology of creation is not just about remote beginnings or the distant acts of a divine originator rather the incarnate jesus christ is himself remarkably the means and the end for which creation itself exists if we would think aright about our world study it and live within it wisely we must reckon centrally with his significance what might such a bold claim possibly mean and why is jesus christ said by christian theology to be so important for understanding god s overall relationship to the created order what does this importance mean for science christ and the created order addresses these questions by gathering insights from biblical scholars theologians

historians philosophers and scientists this interdisciplinary collection of essays reflects on the significance of jesus christ for understanding the created world particularly as that world is observed by the natural sciences contributors to christ and the created order include marilyn mccord adams richard bauckham deborah haarsma paul moser murray rae james k a smith norman wirzba n t wright and more

coming to terms with a troubled past is the mark of the modern condition but how does memory operate this powerful collection of original essays probes this question by focusing on germany where historical trauma and political turbulence over the past century have deeply scarred modern memory and identity tracing the role of memory in german history between the reformation and reunification contributors show how memory has a history and the presence of the past has historical context with scholarly zeal and keen insight these essays draw on ghost stories and the postwar fiction of heinrich b ll among other memory sites escorting the reader through the streets of alt hildesheim and the grocery aisles of east germany by historicizing memory this volume surpasses the efforts of previous memory scholarship in confronting germany s national socialist past standard approaches to memory in modern germany have explored how the past represents social relations and is commemorated in literature art and personal narrative in taking memory out of the museum and beyond the monument the work of memory investigates the ways memory forms social relations and is integral to the construction of identities communities and policies profound and provocative the work of memory contributes to a much needed anthropology of memory in modern germany

time surrounds us it defines our experience of the world it echoes through our every waking hour time is the very foundation of conscious experience yet as familiar as it is time is also deeply mysterious we cannot see hear smell taste or touch it yet we do feel it or at least we think we feel it no wonder poets writers philosophers and scientists have grappled with time for centuries in his latest book award winning science writer dan falk chronicles the story of how humans have come to understand time over the millennia and by drawing from the latest research in physics psychology and other fields falk shows how that understanding continues to evolve in search of time begins with our earliest ancestors perception of time and the discoveries that led with much effort to the gregorian calendar atomic clocks and leap seconds falk examines the workings of memory the brain s remarkable bridge across time and asks whether humans are unique in their ability to recall the past and imagine the future he explores the possibility of time travel and the paradoxes it seems to entail falk looks at the quest to comprehend the beginning of time and how time and the universe

may end finally he examines the puzzle of time s flow and the remarkable possibility that the passage of time may be an illusion entertaining illuminating and ultimately thought provoking in search of time reveals what some of our most insightful thinkers have had to say about time from aristotle to kant from newton to einstein and continuing with the brightest minds of today

from the start the soviet human space program had an identity crisis were cosmonauts heroic pilots steering their craft through the dangers of space or were they mere passengers riding safely aboard fully automated machines tensions between soviet cosmonauts and space engineers were reflected not only in the internal development of the space program but also in soviet propaganda that wavered between praising daring heroes and flawless technologies soviet space mythologies explores the history of the soviet human space program within a political and cultural context giving particular attention to the two professional groups space engineers and cosmonauts who secretly built and publicly represented the program drawing on recent scholarship on memory and identity formation this book shows how both the myths of soviet official history and privately circulating counter myths have served as instruments of collective memory and professional identity these practices shaped the evolving cultural image of the space age in popular soviet imagination soviet space mythologies provides a valuable resource for scholars and students of space history history of technology and soviet and post soviet history
